

FOOD POLICY

In light of tighter regulations from the Environmental Health Office it is University Policy not to allow customers to provide their own food within Catering Services areas for function purposes.

Catering Services are required to use nominated suppliers for all produce - these suppliers have been strictly audited in order to ensure that the products purchased are of a high quality and that there is a traceability system in place should there be any deviation from the set standard. Allowing customers to bring in their own food items would not allow us to exercise this control.

We are grateful for your co-operation in this matter

CATERING SERVICES MANAGER
