# How to connect to SVE from an Android device

1. The VMware Client app is available from the Google Play store – search for 'vmware'.
   Several apps will be returned, select and install the VMWare Horizon Client.

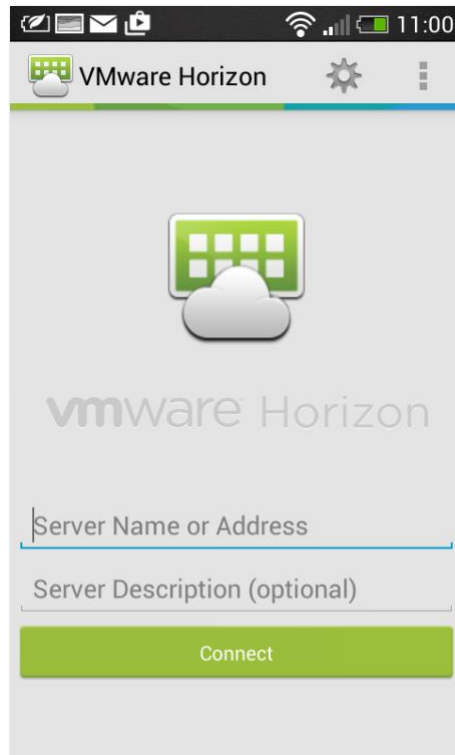

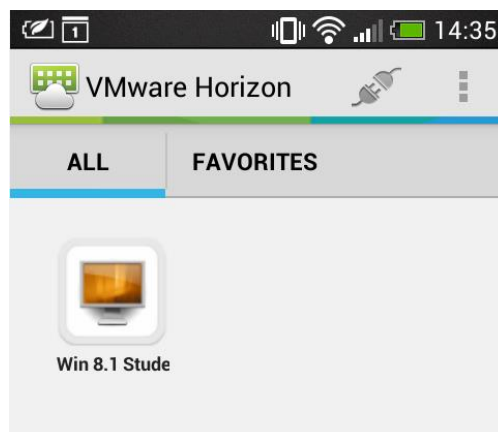

2. Click Install:

3. Click 'Accept'
4. Once installed, the app will be available to use.

5. Tap the Horizon icon. Once it starts you will see the following screen. Enter vdi.soton.ac.uk as the Server address.

6. Enter your username and password.

7. Once logged in, you will see the Windows desktop available to you. Tap Windows 8.1 Student.

8. You will now connect to a virtual desktop. Your Windows 8.1 desktop will appear as it would on a University Workstation.

9. Tap on the Logoff icon on the desktop to end your session and select continue.

NB: If you do not sign out and close the browser, your session will remain open for 15 minutes. After this time you will automatically be logged out.
