

Empowering you to reach your potential

Audiology courses at Southampton

Our integrated range of programmes and short courses offers you unique opportunities to achieve your aspirations

As a learner, you will be part of the world-renowned and award-winning Institute of Sound and Vibration Research, taking advantage of our research-led ethos, outstanding facilities and supportive culture. Our experienced, enthusiastic and multi-disciplinary staff are passionate about your success.

- Embark on NHS-funded pre-registration training with our award-winning BSc programme or our Postgraduate Diploma
- Broaden your horizons with individual Year-4 BSc-level modules in a variety of areas
- Accelerate your career with the MSc Audiology (est. 1972) as part of Higher Training Scheme
- Expand your expertise with our Balance Courses and MSc-level modules in audiology, biomedical signal processing and cochlear implant processing
- Discover and innovate with research degrees, including the new Master of Clinical Research
- Aspire to leadership roles with the PhD and Doctorate in Clinical Practice programmes

Come and visit us on stand 38 at the BAA Conference (Wednesday 26th Nov only) or request a brochure by emailing: audiology-enquiries@soton.ac.uk
