

Programme Specification

Title of programme: BM6 Programme 2017-18

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution	University of Southampton
Teaching Institution	University of Southampton
Mode of Study	Full-time
Duration in years	6 Years following standard progression for a full-time student
Accreditation details	Currently accredited by the UK General Medical Council
Final award	Bachelor of Medicine, Bachelor of Surgery & Bachelor of Medical Sciences
Name of award	Bachelor of Medicine, Bachelor of Surgery
Interim Exit awards	Certificate of Higher Education in Biomedical Sciences, Diploma of Higher Education in Biomedical Sciences, Bachelor of Medical Sciences
FHEQ level of final award	6
UCAS code	A102
QAA Subject Benchmark or other external reference	Medicine
Programme Lead	Dr Sally Curtis
Date specification was written	08/08/2014.
Date Programme was validated	15/11/2012
Date specification was last updated	04/08/2016 revised June 2017

Programme Overview

Brief outline of the programme

The BM6 is a 6-year widening access programme. This programme includes an additional year of study, Year 0, which must be successfully completed before students join Year 1 to study alongside students on the five year programme. From Year 1 BM6 students follow a common path with BM5 students.

GMC Accreditation

As well as meeting all of the requirements of the University, the BM programmes at Southampton all lead to the qualification of Bachelor of Medicine, Bachelor of Surgery, which, as a Primary Medical Qualification accredited by the UK General Medical Council (GMC), enables graduates to gain provisional registration with the GMC and apply to work in the National Health Service as a Foundation Year doctor. Information about provisional registration can be found at the GMC website

http://www.gmc-uk.org/doctors/registration_applications/11720.asp.

All students who successfully complete the programme receive an integrated Bachelor of Medical Science (BMedSc) ordinary degree in addition to their Bachelor of Medicine, Bachelor of Surgery Degree. Selected students who successfully apply to transfer onto the BMBS with integrated Masters in Medical Science (MMedSc) programme do not receive an ordinary degree and receive a Masters in Medical Science instead (see separate programme specification).

The programme fulfils all of the requirements of the GMC through aligning with the required standards; and taking heed of the guidance documents published by the GMC in relation to Undergraduate Medical Education (UME) which are published on their website http://www.gmc-uk.org/publications/undergraduate_education_publications.asp.

The learning outcomes for the programme are aligned with the "outcomes for graduates" produced by the GMC and all aspects of the programme design, delivery and management meet the standards and requirements set out in "Promoting Excellence: Standards for Medical Education and Training". The professional values students must meet and how we deal with concerns about Students' fitness to

practise are in line with “Professional behaviour and fitness to practise: guidance for medical schools and their students”.

Educational Approach

All of the BM programmes are underpinned by **three key educational principles** which have both informed and guided its development. These are that the curriculum should:

- enable students to relate their learning to future practice;
- encourage students to understand concepts and principles rather than merely reproduce factual knowledge;
- encourage students to adopt independent thought and self-direction in learning.

The curriculum is designed to be Integrated, systems/speciality Based and spiral in nature, with clinical context throughout the programme, including early patient contact and longitudinal placements in later years. Students are expected to become progressively more independent and self-directed in their learning.

Clinical Context throughout the programme with Early Patient Contact. The learning outcomes of the programme fall into three main categories – The Doctor as a Scholar and a Scientist, The Doctor as a Practitioner and The Doctor as a Professional which permeate throughout the course. Whilst there is greater emphasis on the Doctor as a Scholar and a Scientist in the early years and a greater emphasis on the Doctor as a Practitioner in later years and the phases of our courses are named accordingly (see Programme Structure section) there is no pre-clinical and clinical split to the programmes and student have patient contact and placement based learning from the first year of the course in all programmes. Aside from the placement based learning in the early years clinical context is enhanced through the use of patient cases (paper based, expert patient based or virtual patient based) and practising skills in clinical skills suites with peers and simulations.

Integrated Curriculum – This means that students are taught their knowledge and understanding (Doctor as a Scholar and a Scientist), clinical skills (Doctor as a Practitioner) and professional skills (Doctor as a Professional) in an integrated fashion and not separately.

Systems/Speciality Based Curriculum –The curriculum is organised around body systems (e.g. cardiovascular system, renal system, endocrine system) rather than subject areas. In the later years the placements are organised by specialities (e.g. primary care, medicine, surgery, child health, psychiatry).

Spiral Curriculum – This means that many aspects of the curriculum (subjects, themes, systems, diseases and specialities) will appear in the curriculum on multiple occasions to enable students to build up their knowledge and skills in this area over time. For example, the programmes and modules mostly follow the principle that students will initially learn about the body/patients under normal circumstances “the body in balance” before moving onto pathological circumstances “the body in disturbance” and within this area students will normally focus on knowledge and skills that enable them to make a differential diagnosis first before progressing to knowledge and skills in investigation and management.

Longitudinal Placements –

Where possible we have organised our clinical placements such that students remain in one centre for relatively long periods of time. This is because effective workplace learning requires social interaction and for learners to be integrated into the team (communities of practise model). This is more likely to be achieved if students have more longitudinal placements. This is particularly true of final year where we aim to place students in one centre for final year modules in Medicine, Surgery and Student Selected Unit (4). We also aim for students to remain at this centre for the duration of their final year Primary Medical Care module. Students will have opportunities to gain experience of working in a variety of hospitals over the course of their programme. All clinical placements are quality assured by the Faculty to ensure that all students have access to an equivalent educational experience.

Progressive increase in independent and self-directed learning – Medicine is ever evolving and no medical programme will ever prepare students for all the knowledge and skills that they will need in their career therefore we aim to provide students with the core knowledge and skills they need (based primarily around the most common conditions they are likely to encounter) along with the ability to continually learn and develop in order to prepare them for their career. The pace at which this progression is expected is adjusted according to each of the BM Programmes, Nonetheless all programmes start with greater direction given to students about the exact learning activities they should take part in and the level of detail provided in terms of syllabus to learn to help them identify and develop the skills needed for independent study. The focus will be on helping students to understand core knowledge, concepts, principles and skills from which students can then apply their knowledge and skills to new situations. Prepared patient cases, simulated environments and expert patients are used in the early years before encouraging students to interact with patients independently later in the course. Due to the nature of placement based learning the exact learning of each student is always going to be different so whilst we will ensure that students all receive the same broad opportunities for learning it is the responsibility of the student to make the most of the opportunities

provided, identify gaps in their knowledge and skills and be proactive in securing experiences and/or resources to help them fill these gaps.

Learning and teaching

The Year 0 curriculum is specifically designed to fill the attainment gap whilst developing confidence and other key skills to smooth the transition into Year 1. The main teaching sessions are largely interactive and are supported by additional weekly tutorials. Students will also experience a range of observational health care placements, in both primary and secondary care settings. The placements provide an insight into multidisciplinary team working and the patient experience, which alongside taught sessions facilitates professional development.

A wide range of learning and teaching methods are also employed in the following years.

In BM Year One this is predominantly classroom based; including lectures, tutorials, practical classes and guided self-study using on line learning. There is a structured clinical module, Medicine in Practice 1, providing early patient contact.

Learning in BM Year Two is similarly classroom based but with a greater contribution of early clinical contact with the Medicine in Practice 2 module.

The research project that starts BM Year Three is a 16 week study of scientific research, clinical research or service evaluation the teaching of which is usually predominantly individual supervision.

The remainder of the course is almost exclusively clinical in a wide range of healthcare placements, though there are some modules and teaching sessions within the later years of the course which are more classroom based and designed to integrate the more theoretical knowledge from the early years with the more practice based experiences in later year.

Clinical placements are subject to change but currently take place across the South of England and Channel Islands from as far afield as Dorchester in the west and Chichester to the east, Jersey & the Isle of Wight to the south and Camberley, Guildford and Basingstoke to the north. Students are likely to encounter a diverse range of patients from all backgrounds and as such will be well prepared as future doctors to address the health needs of the population. However even when our students are outside Southampton on placement, they still remain part of the faculty of medicine and are well supported by both the administrative team and the pastoral team of experienced senior tutors.

Unless students have significant personal circumstances (criteria available in the Undergraduate Handbook) they will be expected to study at the site at which they have been allocated.

Whilst Years 1 and 2 mostly follow the University Semester calendar, the rest of the programme does not follow the university semester calendar and students must prepare for much shorter vacations with teaching and assessments (including supplementary assessments) outside the usual University timeframes (term dates and assessment dates are published well in advance in the Undergraduate Handbook), Wednesday afternoons are usually kept free for students to participate in sporting commitments if required for the first three years of the programme only.

Doctors work in shift patterns and rotas throughout much of their working lives and to prepare you for such working once they graduate, throughout their programme they will be expected to undertake placements in the evenings, **nights** and at weekends. This will not be an onerous requirement and will be negotiated well in advance so that students with carers' requirements will be able to ensure appropriate arrangements are in place for cover. In addition, many non-core learning opportunities will be available during these times and students are encouraged to take advantage of them

Assessment

The Faculty's assessment policy is that all assessments will be offered formatively before they are undertaken summatively. The range of assessments reflects the range of learning outcomes and includes: Multiple choice examinations, written problem solving examinations, practical papers for Anatomy, written reports, reflective writing; learning log books and clinical assessments which usually take the form of Objective Structured Clinical Examinations (OSCE) and Assessments of Clinical Competence (ACC). Students are also required to demonstrate competence in practical procedures and basic and intermediate life support to be able to graduate (details of which are available in our Undergraduate Handbook and within module profiles.)

Progress from one year of the programme to the next will depend upon the successful completion of the appropriate modules, and freedom from health, behavioural and conduct problems relevant to future employment as a medical practitioner. Further details are available in the Fitness to Practise regulations.

Please note: As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration, however, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our [Disclaimer](#) to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's Quality Handbook.

Educational Aims of the Programme

The programme aims to help you develop into a doctor able to carry out the role of an NHS Foundation Year One Doctor; a graduate with the capability to develop, learn and work in a wide variety of settings, nationally and globally, in the context of emergent changes to systems and populations.

Within this broad aim some of the key specific aims are to:

- Enable you, after graduation, to undertake the duties and further studies appropriate to an NHS Foundation Year One Doctor;
- Provide you with a programme of study and skills development that will enable you to become a competent practitioner with the capability to follow a career in any branch of medicine;
- Enable you to become a competent practitioner in a modern, changing health service and society;
- Encourage you to think critically and develop the ability to learn independently;
- Develop the key skills and attitudes which underpin high quality professional practice;
- Provide you with a stimulating, open and supportive environment;
- Enable you to work in a multidisciplinary team, valuing and respecting colleagues.

It is essential that students understand that learning to be a doctor requires them to develop professional behaviour as well as knowledge and skills; we expect this to start from the beginning of the programme and develop as they progress.

The programme delivers the main learning outcomes under the framework provided through the GMC's *Good Medical Practice* which sets out the principles of professional practice which must form the basis of medical education.

The duties of a doctor registered with the General Medical Council

Patients must be able to trust doctors with their lives and health. To justify that trust medical students and doctors must show respect for human life and make sure their practice meets the standards expected of them in four domains.

Knowledge, skills and performance

- Make the care of your patient your first concern.
- Provide a good standard of practice and care.
 - Keep your professional knowledge and skills up to date.
 - Recognise and work within the limits of your competence.

Safety and quality

- Take prompt action if you think that patient safety, dignity or comfort is being compromised.
- Protect and promote the health of patients and the public.

Communication, partnership and teamwork

- Treat patients as individuals and respect their dignity.
 - Treat patients politely and considerately.
 - Respect patients' right to confidentiality.
- Work in partnership with patients.
 - Listen to, and respond to, their concerns and preferences.
 - Give patients the information they want or need in a way they can understand.
 - Respect patients' right to reach decisions with you about their treatment and care.
 - Support patients in caring for themselves to improve and maintain their health.
- Work with colleagues in the ways that best serve patients' interests.

Maintaining trust

- Be honest and open and act with integrity.
- Never discriminate unfairly against patients or colleagues.

- Never abuse your patients' trust in you or the public's trust in the profession.

Medical Students are personally accountable for their professional practice and must always be prepared to justify their decisions and actions

Programme Learning Outcomes

The UK General Medical Council defines the learning outcomes of Undergraduate medical programmes in its 'Outcomes for graduates' document and categorises them as "The Doctor as a Scholar and a Scientist", "The Doctor as a Practitioner" and "the Doctor as a Professional. The programme learning outcomes therefore align with these.

Knowledge and Understanding

The doctor as a scholar and a scientist

Having successfully completed this programme you will be able to:

- [1.1] Apply to medical practice biomedical scientific principles, method and knowledge relating to: anatomy, biochemistry, cell biology, genetics, immunology, microbiology, molecular biology, nutrition, pathology, pharmacology and physiology.
- [1.2] Apply psychological principles, method and knowledge to medical practice.
- [1.3] Apply social science principles, method and knowledge to medical practice.
- [1.4] Apply to medical practice the principles, method and knowledge of population health and the improvement of health and healthcare.
- [1.5] Apply scientific method and approaches to medical research.

Teaching and Learning Methods

- Teaching is integrated so that the natural, social and behavioural scientific disciplines are taught together in a clinical context;
- Three themes run through the programme: Communication, Diversity, and Team Working, Leadership and Patient Safety;
- Specific teaching and learning methods used include: lectures, tutor led tutorials, practicals, guided self-study, problem solving scenarios, role play, projects, group work, portfolios, study packs, eLearning, patient-based learning. Clinical teaching takes place from the start of the programme, and occurs in groups and singly in a wide variety of NHS and non-NHS settings;
- There is a focus on those designed to develop enquiry and practical skills; such as lectures, tutor-led tutorials, practicals and eLearning.

Assessment methods

A range of assessment methods are used depending on the learning outcomes being assessed.

- Coursework will include: essays, reports, posters, project reports and presentations;
- Examinations will include written tests and tests of clinical performance.

Transferable and Generic Skills

Having successfully completed this programme you will have a range of generic skills. Some are entwined in the subject specific intellectual and research skills and subject specific practical skills section of this document; but you will also specifically be able to:

- apply theoretical knowledge to practical situations in a wide variety of settings;
- gather information from a range of sources to enable you to develop a comprehensive understanding of complex situations;
- assess complex problems (including high pressure and emergency situations) and be able to develop an action plan to manage them;
- demonstrate high level communication skills;
- negotiate with a wide range of people;
- use computers and other information sources to enable you to undertake a range of tasks;
- understand and demonstrate confidentiality in the handling of data;
- show a reflective approach to work and learning;
- teach peers and colleagues;

- manage your time and prioritise tasks, working autonomously where appropriate;
- respond to the outcome of your own appraisal and contribute to the development and appraisal of colleagues;
- work effectively as a member of a multidisciplinary team, respecting the contributions of all team members;
- deal effectively with uncertainty and change;
- demonstrate understanding of health and safety, quality assurance and risk management in the workplace;
- demonstrate awareness of the importance of the use and prioritisation of resources.

Teaching and Learning Methods

- All modules will enable you to learn how to apply theoretical knowledge to a wide range of settings and will encourage you to gather information to help you understand problems. This skill will be further developed as you learn to take histories from patients in clinical modules. In clinical modules in particular you will learn the importance of time management, prioritisation, multidisciplinary team working, management of uncertainty and change, and use of resources;
- Throughout the programme, you will use a portfolio approach to reflection; supplemented by tutorials and your annual PPDR (Personal Performance and Development Review) ;
- You will participate in tutorials to prepare you to prepare for and undertake peer teaching sessions and will be expected to demonstrate teaching during case based presentations;
- You will be required to participate in an annual appraisal (PPDR) with your personal tutor as noted above and will be expected to provide feedback for colleagues and teachers which can contribute to their PPDRs.

Assessment methods

- Many of these skills will be assessed in the clinical sign off elements of assessment of clinical modules;
- Some aspects of dealing with change and high pressure situations will be assessed through assessment of Intermediate Life Support;
- Your portfolio will be assessed by your tutors throughout the programme;
- Peer teaching will be assessed by tutors and peers;
- Some of these skills, which focus on the development of many of the behaviours required of you as a professional in the workplace, are not assessed by examinations, but through our Student Progress processes; and are covered by the University's Fitness to Practise policy and procedures.

Subject Specific Practical Skills

The doctor as a practitioner

Having successfully completed this programme you will be able to:

- [2.1] Carry out a consultation with a patient.
- [2.2] Diagnose and manage clinical presentations.
- [2.3] Communicate effectively with patients and colleagues in a medical context.
- [2.4] Provide immediate care in medical emergencies.
- [2.5] Prescribe drugs safely, effectively and economically.
- [2.6] Carry out practical procedures safely and effectively
- [2.7] Use information effectively in a medical context.

Teaching and Learning methods

- Most teaching will be patient-based; supplemented by clinical skills work. There will also be tutorials, lectures, role play, group work, eLearning, case based discussions and presentations.
- There is early patient contact through the Medicine in Practice modules, which include weekend shift placements as a Healthcare Support Worker in a hospital;
- Clinical skills simulation is used to teach clinical skills before they are used in practice;
- A wide range of clinical placements are available to enable you to become confident in all aspects of clinical medicine.

Assessment methods

A range of assessment methods are used depending on the learning outcomes being assessed.

- Coursework can include: essays, reports, posters, project reports, learning log books, reflections, clinical skills sign offs, case based discussions and presentations;
- Examinations will include written tests and tests of clinical performance;
- There will be formative assessment of clinical performance throughout clinical modules, and summative clinical assessments. Assessments of clinical performance take three main forms:
 - the Objective Structured Clinical Examination (OSCE)
 - The Assessment of Clinical Competence (ACC) assessments which are undertaken during clinical modules in a continuous manner for all students and are part of the BM Year Five Finals examination for some students. Students who fail to gain exemption during the placement based assessments will be re-examined in Southampton during the finals examinations;
 - Sign off of competence in practical procedures, basic and intermediate life support.

Disciplinary Specific Learning Outcomes

The doctor as a professional

Having successfully completed this programme you will have become a medical professional which means that you will:

- [3.1] Behave according to ethical and legal principles.
- [3.2] Reflect, learn and teach others.
- [3.3] Learn and work effectively within a multi-professional team.
- [3.4] Protect patients and improve care.

Teaching and Learning Methods

- Teaching is integrated so that professionalism skills are taught alongside knowledge and understanding and practical skills.
- Explicit teaching and learning methods used include: lectures, tutorials, guided self-study, problem solving scenarios, reflection, group work, learning log books and case based discussions.
- In addition role modelling by staff and colleagues is a key method of teaching and learning in this area.

Assessment methods

- Assessment of professionalism is embedded in all clinical module assessments as well as OSCE and ACC assessments.
- It is also embedded within some of the early year's modules.
- Some of these skills are not assessed by examinations, but are monitored through our Student Progress processes; and are covered by the University's Fitness to Practise policy and procedures.

Programme Structure

Typical course content

The BM6 programme delivers a comprehensive range of opportunities for you to meet the learning outcomes and graduate as a doctor equipped to practise in the 21st Century.

Medicine is by nature a wide ranging discipline and you will not be able to study every aspect of every speciality as an undergraduate. However, the course is structured to provide you with a solid base from which to progress into the Foundation programme.

The year 0 curriculum is well matched to the demands of the subsequent years. Students will learn by understanding principles and concepts and contextualising that learning by applying it in medical and patient

focussed scenarios. The curriculum integrates a range of relevant disciplines, encouraging students to learn across levels (cells, tissues, systems and the whole individual).

The programme is split into four distinct phases. The Fundamentals of Medicine phase takes place over the first three years and is made up of six University semesters; the Progression into Clinical Practice Phase takes place in BM Year Three. The Developing Clinical Practice phase takes place through BM Year Four and the first half of BM Year Five and ends with the BM Year Five examinations. The final phase – Preparing for Independent Practice – takes place in the second half of BM Year Five and finishes with Graduation.

There are three themes that run through the programme: Communication, Diversity, and Teamworking, Leadership & Patient Safety. Learning around these themes is integrated throughout the programme. Clinical Skills are taught in the Medicine in Practice modules initially and developed further in the clinical skills components of the clinical modules.

The programme is modular; modules are assigned credits for the European Credit Transfer Scheme (ECTS). Details of the modules can be found in the table below. The programme is totally integrated to award the BMBS honours degree and the BMedSc Ordinary degree. A BMedSc honours degree can only be awarded alone as an exit degree. There are defined exit points with appropriate academic awards after successfully completing parts of programme, which you may apply for if you leave the programme (see table below). All modules on the programme are core and must be passed in order to progress and graduate. There cannot be compensation between any modules in any part of the programme.

A diagrammatic illustration of the curriculum can be found in a separate “Curriculum Plan” document. Further details of each module can be found in their individual respective Module Profiles.

Highly performing students who over the programme consistently achieve excellent assessment scores will be awarded a BMBS degree with distinction.. Distinctions are also available for individual phases of the programme. Further details regarding the criteria for award of distinction is available in the Undergraduate Handbook available on Blackboard

Students will be eligible for an interim exit award if they complete part of the programme but not all of it, as indicated in the table below.

Year	Year Name	Module	Credits (ECTS)	Level (FHEQ)	Exit Award
Fundamentals of Medicine Phase					
1	BM Year ZERO	Human Structure & Function 1	15	3	
1	BM Year ZERO	Professional Practice 1	15	3	
1	BM Year ZERO	Human Structure & Function 2	15	3	
1	BM Year ZERO	Professional Practice 2	15	3	
2	BM Year ONE	Foundations of Medicine	22.5	4	
2	BM Year ONE	Nervous and Locomotor 1	7.5	4	
2	BM Year ONE	Respiratory Cardio and renal 1	15	4	
2	BM Year ONE	Medicine in practice 1	7.5	4	
2	BM Year ONE	Student Selected Units 1 & 2	7.5	4	
		End of YEAR 1	60	4	Certificate of HE in Biomedical Sciences
3	BM Year TWO	Respiratory Cardio and renal 2	7.5	5	
3	BM Year TWO	Nervous and Locomotor 2	15	5	
3	BM Year TWO	Gastrointestinal	7.5	5	
3	BM Year TWO	Endocrinology & the Lifecycle	15	5	
3	BM Year TWO	Medicine in practice 2	7.5	5	
3	BM Year TWO	Research for Medicine & Health	7.5	5	
		End of YEAR 2	180 ECTS including 60 at level 5, 60 Level 4 & 60 at level 3		Diploma of HE in Biomedical Sciences
Progression into Clinical Practice Phase					
4	BM Year THREE	Research Project	22.5	6	
4	BM Year THREE	Medicine and Elderly Care	15	6	

4	BM Year THREE	PMC & Chronic Disease	15	6	
4	BM Year THREE	Surgery and Orthopaedics	15	6	
4	BM Year THREE	Scientific Basis of Medicine	7.5	6	
4	BM Year THREE	Student Selected Unit 3	7.5	6	
4	BM Year THREE	BM Year Three Assessment (OSCE)	7.5	6	
		If pass a total of 30 credits in BM Year 3	210 ECTS including 30 at level 6, 60 at level 5, 60 at level 4 and 60 at level 3		Ordinary Degree in Biomedical Sciences
		If pass a total of 60 credits in BM Year 3	240 ECTS including 60 at level 6, 60 at level 5, 60 at level 4 and 60 at level 3		Honours Degree in Biomedical Sciences
		End of YEAR 3	270 including 90 at level 6, 60 at level 5, 60 at level 4 and 60 at level 3		Honours Degree in Biomedical Sciences
Developing Clinical Practice Phase					
5	BM Year FOUR	Psychiatry	15	6	
5	BM Year FOUR	Acute Care	7.5	6	
5	BM Year FOUR	Specialty Weeks	7.5	6	
5	BM Year FOUR	Obstetrics and Gynaecology & Genitourinary Medicine	15	6	
5	BM Year FOUR	Child Health	15	6	
5	BM Year FOUR	Clinical Ethics & Law	7.5	6	
5	BM Year FOUR	BM Year Four Assessment (written papers)	7.5	6	
		End of YEAR 4	345 ECTS including 165 at level 5, 60 at level 5, 60 at level 4 & 60 at level 3	6	
6	BM Year FIVE	Surgery	15	6	
6	BM Year FIVE	Primary Medical Care	7.5	6	
6	BM Year FIVE	Medicine	15	6	
6	BM Year FIVE	Student Selected Unit 4	7.5	6	
6	BM Year FIVE	Personal and Professional Development	7.5	6	
6					
6	BM Year FIVE	BM Year Five Assessment & ILS	15	6	
6	BM Year FIVE	Elective	15	6	
6	BM Year FIVE	Assistantship	7.5	6	
		End of YEAR 5	435 ECTS including 255 at level 6, 60 at level 5, 60 at level 4 and 60 at level 3		Bachelor of Medicine, Bachelor of Surgery & Ordinary Degree in Biomedical Sciences

Special Features of the programme

Year 0: Students entering Year 0 are welcomed from very diverse backgrounds traditionally underrepresented in medicine. The relatively small group of students together with an interactive teaching approach creates a culture of active and therefore deep learning. Professional development is a major feature of, which alongside high levels of academic and personal support, helps students develop the skills required for success in future study and practice. .

Research Opportunities, BMedSc & Option of MMedSc: All students undertake a research project in year three leading to the award of a BMedSc as well as the BMBS. Students will be able to select their BM Year Three research project from a wide range of research fields, providing them with further opportunities to explore

areas of interest. There is also the opportunity to study for a MMedSc award by applying to transfer onto the BMBS with Integrated MMedSc programme.

Patient Contact from the outset: Throughout Year 0 students experience early patient contact, provided through sessions at 3 healthcare placements. These placements are delivered in both primary and secondary healthcare settings. Early patient contact takes place in the Medicine in Practice module in BM years 1 and 2 and enables the students to experience clinical medicine in primary care and the hospital setting. In addition all students are expected to work with Health Care Support Workers for a number of weekend shifts to enable them to understand the working environment of a hospital ward and to gain confidence in talking to patients and understanding their basic care needs.

Student Choice & Humanities Teaching: There are Student Selected Units in years 1, 3 and 5, provide students with opportunities to explore areas that particularly interest them; Students undertake student selected units in Humanities and Public Health in year 1. A range of student selected units are open to students in years 3 including the option to study a language. The BM Year Five SSU offers a chance to explore areas of clinical interest for their future career.

Student Support: Southampton has a very strong reputation for its excellent student support mechanisms. All students will be allocated a personal academic tutor during their time on their course, and there are a range of support services offered by the University. In addition to this, the Medical Faculty in Southampton also employs a team of experienced Faculty based senior tutors who can provide additional support for medical students during their course.

The Programme offers a flexible and inclusive approach to learning to enable any student who meets the entry requirements to access the curriculum and demonstrate achievement of all the intended learning outcomes. Reasonable adjustments are made for individual learners as required; and in this the Faculty follows GMC guidance "Gateways to the Profession"

Student Engagement: We are proud of our level of student engagement in the Faculty of Medicine in all areas of the course from management of the medical faculty, curriculum design and review, delivery of the teaching and assessment, research and outreach activities. We see students as partners in the running of our programmes and were awarded an International ASPIRE award for our Excellence in Student Engagement

Study Abroad Opportunities: All students have the opportunity to undertake study abroad in the Clinical Elective module in BM Year Five.

This programme involves mandatory placements in all years. Almost all placements are organised by the Faculty. However, you will need to organise your own placement for the Electives module in BM Year Five. Where arranged by the Faculty, placements will usually be based in NHS trusts and GP practices.

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. Costs that students registered for this programme typically also have to pay for are included in Appendix 2.

Progression Requirements

The programme follows the University's regulations for ***Progression, Determination and Classification of Results: Undergraduate and Integrated Masters Programmes*** as set out in the University Calendar. The programme has been granted some exemptions and variations to the University's General Regulations. Students should refer to the BM Programme Regulations as set out in the University Calendar in addition to the General Regulations

Progress from one year of the programme to the next will depend upon the successful completion of the appropriate modules, and freedom from health, behavioural and conduct problems relevant to future employment as a medical practitioner. Further details are available in the Fitness to Practise regulations.

As outlined in the Calendar regulations, students on this programme are not entitled to a repeat year unless it is allowed due to special considerations/student progress committee approval. Where exceptionally a repeat year is allowed, or where a student has suspended by their study a maximum programme length may apply. As governed and determined by the student progress committee, the maximum total duration of a student's programme (including any interruptions through suspension or repeat attempts) is no more than 8 calendar years for students on this BM6 programme and students who have are exceptionally allowed repeat years or suspensions will be informed of this.

Students who have failed module(s) and are entitled to further attempts will be required to undertake that further attempt at the next available opportunity which may be the next academic year (i.e. repeating the entire year). Students who are required to undertake re-assessment in excess of the weeks available will be referred to the Student Progress Committee and may be required to suspend from the programme and return in the following academic session.

The programme follows the University's regulations as set out in the University Calendar, for the Faculty of Medicine BM6 programme regulations.

Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

Specifically BM6 students:

- Receive financial support in the form of a £1,000 bursary in Year 0
- Are eligible for two years' accommodation in the University's halls of residence.
- Receive regular high quality feedback through weekly small group tutorials and individualised feedback on all assessments.

The University provides:

- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources
- high speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure file store and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Student Services Centre
- Enabling Services offering assessment and support (including specialist IT support) facilities if you have a disability, dyslexia, mental health issue or specific learning difficulties
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards
- Career Destinations, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV
- a range of personal support services : mentoring, counselling, residence support service, chaplaincy, health service
- a Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Students' Union provides

- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students' views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

Associated with your programme you will be able to access:

- a Personal Academic Tutor
 - a Senior Tutor identified for each phase of the programme
 - in your Foundation module, you will have regular tutorials with a Foundation Tutor, to help you adjust to University level study specific to Medicine
 - Faculty computer workstations in the Health Services library at Southampton General Hospital. There is also access to University workstations in most NHS Trusts where you undertake clinical modules
 - whilst undertaking clinical modules, you have access to support from the Module leader, the Lead consultant of your placement and their team, and the Associate Clinical Sub dean in the Trust where you are placed.
 - study skills support which is provided by module leaders as required.
-

Methods for evaluating the quality of teaching and learning

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing student evaluation questionnaires for each module of the programme
- Acting as a student representative on various committees, e.g. Staff: Student Liaison Committees, Faculty Programmes Committee OR providing comments to your student representative to feedback on your behalf.
- Serving as a student representative on Faculty Scrutiny Groups for programme validation
- Taking part in programme validation meetings by joining a panel of students to meet with the Faculty Scrutiny Group

The ways in which the quality of your programme is checked, both inside and outside the University, are:

- Regular module and programme reports which are monitored by the Faculty
- Programme validation, normally every five years.
- External examiners, who produce an annual report
- Accreditation and inspection by the General Medical Council, who monitor and evaluate not just the curriculum, assessments and clinical placements; but also the staff development of all teachers, and the student support which we provide.
- A national Research Assessment Exercise (our research activity contributes directly to the quality of your learning experience)
- Higher Education Review by the Quality Assurance Agency for Higher Education
- We further monitor the quality of your clinical placements by robust quality monitoring and enhancement activities which include regular visits and evaluation of all NHS trusts and other clinical settings where you are placed.

Criteria for admission

The University's Admissions Policy applies equally to all programmes of study. The following are the typical entry criteria to be used for selecting candidates for admission. The University's approved equivalencies for the requirements listed below will also be acceptable.

The University's Admissions Policy can be found at www.southampton.ac.uk/admissions-policy

Qualification	Grades	Subjects required	Subjects not accepted	EPQ Alternative offer (if applicable)	Contextual Alternative offer (if applicable)
GCE A level	BBC	Chemistry and Biology Pass in the practical exam also required	General Studies Critical Thinking Subjects with material that overlaps (e.g. human biology/sports studies/physical education) BTEC Applied Science	N/A	N/A
GCSE	Minimum of five GCSEs at grade C	Mathematics English Language Biology and Chemistry or Additional Science and Science)		N/A	N/A
Cambridge Pre-U	M2 M2 M2	Chemistry and Biology		N/A	N/A
Access to Medicine/Access to Science	May be accepted from approved institutions or with suitable scientific content. 60 credits with a minimum of 45 credits at Level 3 of which 24 credits must be at Distinction and 21 credits at Merit.	Approved Access courses with an appropriate scientific content may be acceptable.		N/A	N/A
International Baccalaureate Diploma	30 points with 16 at Higher Level in three subjects to include 5 in Chemistry and 5 in Biology	Chemistry and Biology		N/A	N/A
Irish Leaving Certificate	H2 H2 H3 H3 H3 H3, with H3 in Chemistry & Biology	Chemistry and Biology		N/A	N/A

Non-Academic Entry Requirements

In addition to academic entry requirements you will be assessed against our non-academic criteria published on our website www.southampton.ac.uk/medicine

Applicants must be able to show they:

- Are self-motivated and resilient
- Have reflected on and learn from life experiences (this may include, work experience, paid employment and personal experiences both in and outside health and social care settings)
- Are able to interact successfully with others
- Can demonstrate an understanding of the values of the NHS constitution

We will offer a place to applicants who meet our academic and non-academic entry requirements and are selected as part of our selection procedure. The entry requirements and selection procedure are as set out in Selection Procedure and Policy which is reviewed annually and available here: [Entry requirements for BM programmes](#)

Recognition of Prior Learning (RPL) The University has a **Recognition of Prior Learning Policy**
This programme does not provide admission through RPL

English Language Proficiency

The course is taught entirely in English.

Overall	Reading	Writing	Speaking	Listening
IELTS 7.0 minimum	7.0 minimum	7.0 minimum	7.0 minimum	7.0 minimum

Career Opportunities

Graduates from all BM programmes have a qualification recognised by the UK General Medical Council and are entitled to provisional registration with the GMC. The qualification is the foundation from which you can progress into specialist training for any branch of medical practice, including the academic pathways; which can be in the UK, Europe or international. Some graduates choose not to pursue a clinical career, and the high level generic skills achieved on completion of the programme together with the clinical background are such that a wide range of other careers are accessible to holders of the BMBS and BMedSc degrees.

External Examiners(s) for the programme

- BM6 Year 0 – Dr Margaret Barnes-Davies, University of Leicester
- BM Years One & Two – Dr Clare Ray, University of Birmingham
- BM Year THREE –Dr Gerard Browne, University of Central Lancashire; Dr Penny Lockwood, University of Dundee
- BM Year FOUR –Dr Alexandra Davidson, University of Cambridge; Dr Liz Bright, West Suffolk Hospital
- BM Year FIVE – Prof Andrew Horne, University of Edinburgh; Dr Juliet Wright, Brighton and Sussex Medical School; Dr Melvyn Jones, University College London Medical School; Mr James Gilbert, Oxford University Hospitals NHS Trust; Dr William Carroll, University Hospital of the North Midlands

Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their personal tutor in the first instance.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme information and student handbook published on Blackboard (www.blackboard.soton.ac.uk).

	SSU4	End of module evaluation form completed by tutor,		
	Assistantship	End of module evaluation form completed by tutor,		
	Clinical Elective	Coursework – Proposal and Risk Assessment	End of module evaluation form completed by tutor,	
	Assessment and ILS (immediate Life Support)	Competency in Intermediate Life Support training Competency in Practical Procedures clinical Competency in ACCs through coursework alone or in combination with ACC examination		Written Examinations x 2 Clinical Examination – OSCE Clinical Examination – ACC for those who did not demonstrate competency through coursework alone.

Appendix 2:

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below.

In some cases you'll be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University's Fees, Charges and Expenses Regulations in the University Calendar available at www.calendar.soton.ac.uk.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Approved Calculators		Candidates may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers. The University approved model is Casio FX-570. This may be purchased from any source and no longer needs to carry the University logo

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Stationery		You will be expected to provide your own day-to-day stationery items, e.g. pens, pencils, notebooks, etc.). Any specialist stationery items will be specified under the Additional Costs tab of the relevant module profile.
Textbooks		<p>Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source.</p> <p>Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.</p>
Equipment and Materials Equipment	Medical Equipment and Materials: Fob watch, stethoscopes	<p>You will need to purchase a stethoscope. No specific make or model is required. You can purchase this from any source. Stethoscopes are available to buy during Faculty induction and prices range from £39.84-£176.40.</p> <p>You will need to purchase a fob watch with a second hand that you can pin to your clothing or put in your pocket, as you are not permitted to wear wrist watches in clinical areas. No specific make or model is required. You can purchase this from any source. Prices start from £1.50.</p>
IT	Hardware	Across all campuses and most halls of residence approximately 1700 computer workstations are available. Students may wish to purchase their own desktop/laptop/tablet computer to support their studies. This is entirely optional .
Clothing	Lab Coats	You will need to purchase a white coat for use in the Anatomy Laboratory. You can purchase this from any source. Lab coats are available from the SUSU Shop priced £12.50 (price at September 2015).
Printing and Photocopying Costs		<p>In the majority of cases, coursework such as essays; projects; dissertations is likely to be submitted on line. However, there are some items where it is not possible to submit on line and students will be asked to provide a printed copy. The University printing costs are currently:</p> <p>A4 – 5p per side (black and white) or 25p per side (colour)</p> <p>A3 – 10p per side (black and white) or 50p per side (colour).</p> <p>Details about printing costs for academic posters can be found here.</p>

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Placements (including Study Abroad Programmes)	Accommodation	You will need to pay for any accommodation required as part of your Elective.
	Insurance	You will need to pay for insurance if you chose to undertake your Elective outside of the UK.
	Medical insurance	You will need to pay for medical insurance if you chose to undertake your Elective outside of the UK.
	Travel costs	<p>You will need to pay £100 per annum towards travel costs associated with clinical placements.</p> <p>You will need to pay for any travel costs required as part of your Elective.</p>
	Immunisation/vaccination costs	<p>You will be expected to pay for any immunisation/vaccination costs required to ensure you have a complete immunisation/vaccination history prior to commencing the programme. Further information on required immunisations/vaccinations is provided to those applicants made an academic offer of study.</p> <p>You will need to pay for any immunisation/vaccination costs associated with overseas travel if you chose to undertake your Elective outside of the UK.</p>
	Disclosure and Barring Certificates or Clearance	You are expected to pay for an enhanced Disclosure and Barring Service Clearance check. This is payable on induction only. The cost is £50 (cost at June 2017).
Conference expenses	Accommodation	Students may have the opportunity to attend an academic conference during their studies. Attendance is optional . You would be expected to pay for the costs of any accommodation associated with the conference if you chose to attend.
	Travel	Students may have the opportunity to attend an academic conference during their studies. Attendance is optional . You would be expected to pay for the costs of any travel associated with the conference if you chose to attend.
Parking Costs		See placements travel costs.
Anything else note covered elsewhere		In your BM Year Five you will need to return to Southampton from clinical placement in order to sit the Situational Judgement Test (SJT). This test is required as part of the application process for The Foundation Programme, which follows directly after graduation. You will normally be required to pay for your travel costs back to Southampton to sit this exam.
