

## Errata corrige and revisions – Cosmology (PHYS 6005)

Typos and changes made on printed version of notes (revised version available on BB)

- At page 21, third line:  $pc \rightarrow m$ ;
- At the end of 2.2 I updated the discussion on GW taking into account that now they have been discovered; the dream became true!
- In 2.6 I decided not to indicate the 3 momentum length with  $p$  since later on the same symbol is used to indicate pressure but above all the 4 momentum vector that might be confused.
- 5 lines after Eq. (6.84) I corrected the expression for  $a_{\max}$  in the radiation dominated regime (a square root was missing).
- In Eq. (8.12) minus signs have been now placed correctly.
