

Polar science: funding and fieldwork opportunities for UK scientists

Thursday 10th July, 2 p.m.

Henry Charnock Lecture Theatre, National Oceanography Centre

How to obtain funding and fieldwork support for conducting your research in the polar regions

Photo by Morag Hunter

Dr. Andrew Meijers

Andrew is a Physical Oceanographer at the British Antarctic Survey, Cambridge, specialising in the investigation of large-scale dynamics of the Southern Ocean

The presentation is intended to:

- Raise awareness of opportunities for UK scientists to conduct research in Antarctica or the Arctic, supported by NERC funding.
- Highlight facilities and logistic support that BAS can offer for fieldwork-based (including ship-based) research in the polar regions
- Explain the process for obtaining access to BAS operational and logistics support

The presentation will be followed by a Q & A discussion
