

**Careers and Employability Service**  
**Additional resources and information for**  
**Ocean and Earth Science**

## **Welcome:**

We have developed this recourse pack to help you research specific job sectors which may be of particular interest to OES students.

- [Prospects.ac.uk](https://prospects.ac.uk) - Options with Geology  
The Prospects site includes information and advice covering: Your skills, job options, career areas, further study, what next, case studies, contacts and job search sites.
- [Marine Biology Education Resources](#) – North American resource site.
- [Sea Grant – Marine Careers](#) – Marine Biology and Oceanography career resources.

## **SKILLS:**

Many employers value the skills acquired from an OES degree which is widely accepted as a rigorous academic discipline. Within your studies you will develop:

- Critical reasoning and analytical skills of research and field data.
- Communication Skills developed from lab reports and scientific writing to interpersonal communication with a range of people in diverse situations.
- The ability to solve problems and think creatively.
- Laboratory skills working with scientific equipment and in manipulating and analysing data using IT, modelling tools, databases and graphical tools.
- Organisations skills, for example fitting in paid employment, field trips and time out into summer vacations etc.
- Scientific rigour and practical fieldwork creating a valuable combination of knowledge, thinking and practical skills which are highly transferable to a range of technical and business roles, and working environments.

Employers, whether for work experience or graduate jobs, expect you to show a professional approach to learning and employment by providing evidence of your skills and knowledge, and specifically how it matches their requirements. So reflecting on your degree and work experience will enable you to appreciate your strengths and give you a database of evidence to convince employers or higher degree providers.

Throughout your degree programme you have access to a number of tailored presentations and workshops providing you with advice on career planning, CV writing and interview tips.

We also host and advertise a number of career roadshows providing you with direct opportunities for networking with recruiters and develop attributes for a range of employment sectors. Check the [OES Careers Blackboard](#) site for further details and explore the [OES Career Webpages](#) for insight in to career options and to browse graduate profiles.

## **Finding Job Vacancies:**

As a graduate from OES you can go into a wide range of occupations, some open to all graduates, and some particularly relevant to your degree. Here's what some of them say:

"Fugro GEOS has employed a number of Southampton oceanographic graduates in recent years. Their employability is characterised by strong mathematical skills and a basic oceanographic grounding, which can be applied to the world of commercial oceanography. The individuals we employ also have an excellent work ethic that includes an essential ability to think for themselves and show initiative. Our employees are offered a number of career paths that include technical, management and engineering."

Mark Calverley, Fugro GEOS Divisional Director

Information and advice about how to find out about employment opportunities can be found on our [Job Hunt webpages](#) and on the [Prospects](#) website. When applying for vacancies you may need support in constructing a CV, filling out an Application Form, drafting a Cover Letter or preparing for Interview. We offer support on all of these areas via our [Job Application Resources webpages](#).

## **Professional Accreditation and Student Membership:**

Taking out student membership of a relevant professional body can offer good networking opportunities, job listings and information, and boost or even register your CV. Many such as the Geology Society have excellent careers and education help on their websites. Becoming a chartered professional can significantly increase your career options. A few are listed below:

- **IMarEST** Institute of Marine Engineering, Science & Technology [www.imarest.org](http://www.imarest.org)
- **Geological Society** [www.geolsoc.org.uk](http://www.geolsoc.org.uk)
- **CIWEM** Chartered Institution of Water and Environmental Management [www.ciwem.org](http://www.ciwem.org)

## **Postgraduate study and research destination examples:**

On average 85% of Oceanography and Marine Biology graduates reported being employed and/or engaged in further study. Around 20% take up higher level study or research immediately after graduation. Many careers directly related to Oceanography are enhanced by postgraduate qualifications.

(Data collected from 2004 to 2012 using the Destination survey six months after graduation and alumni information)
