

TEAtime lecture series: Coral Reefs in Crisis

Free public lecture: Wednesday 14th March
18.00 – 19.00, 32/1015

Coral reefs are one of the most diverse and productive ecosystems on the planet. This talk, by Ed Smith (NOC), will explore the threats to coral reefs, providing an insight into how different stressors affect fundamental processes in corals such as growth, photosynthesis and calcification.
