

'A'  
is for  
Agile

# What we mean when we say 'Agile'

“Agile Project Management is a methodology that is commonly used to deliver complex projects due to its adaptiveness. It emphasizes collaboration, flexibility, continuous improvement, and high quality results”

**Step 2:**  
Test what  
you think  
the answer  
might be

**#OneWebFestival**

**Step 3:**  
Put the  
solution  
into  
production

**#OneWebFestival**

Source: HMRC

**Step 4:**  
Launch it  
(and keep  
making it  
better)

# Why is it the right way to build OneWeb?

- It will help us stay focused on our users and their needs
- It breaks down the unit of delivery into manageable pieces
- It lets us work openly and test often, with users
- It's scalable and adaptable - allows iteration within process
- It creates consistent roles and accountabilities
- It allows efficient use of resources against priorities
- It lets us apply what we learn as we go along
- It's proven to work at scale

# Agile content cycle

#OneWebFestival

# Case study – Environment Agency

## Background/context

- 26,000 content pages. Dual language
- Large document repository
- Split between 8 main directorates
- 62 microsites operating independently
- Significant contact centre support costs

**#OneWebFestival**

# Case study – Environment Agency

## Process and method

- User needs development – data and user research
- Content mapping and delivery plans
- Large-scale Agile delivery process and teams
- Withdrawals, archiving and decommissioning
- Testing and amendment in live environment

**#OneWebFestival**

# Case study – Environment Agency

## Outcomes/Results

- 6 month delivery against hard deadline
- User-centred blueprint and performance platform
- 5400 content items, curated by theme and taxonomy to validated outcomes
- 50% reduction in documents
- No reduction in service or increased cost from significant change
- Over 50 independent sites decommissioned
- Established ongoing team and governance
