

EXERCISE: OPEN QUESTION FUNNELLING

OPEN ENDED questions encourage a greater exploration. When OPEN ENDED questions are repeated in increasing specific terms, this is known as OPEN QUESTION FUNNELLING. (See workbook pgs 10 – 11)

For example:

<div>Least specific</div>  <div>Most specific</div>	<i>How are you feeling?</i>
	<i>How are you feeling following your surgery?</i>
	<i>What difference have your pelvic floor exercises made following your surgery?</i>
	<i>Can you describe the pelvic floor exercises you've been doing after your surgery, and tell me what difference you feel they are making to your recovery?</i>

GIVE AN EXAMPLE OF OPEN QUESTION FUNNELLING:

<div>Least specific</div>  <div>Most specific</div>
