

University Of Southampton Pension and Assurance Scheme for Non Academic Staff

2017 Summary Funding Statement

The purpose of this Statement is to explain the funding of the University of Southampton Pension and Assurance Scheme for Non Academic Staff (the "Scheme").

Summary of the financial position of the Scheme

An "actuarial valuation" is a detailed assessment of the financial position of the Scheme. The last actuarial valuation of the Scheme was carried out as at 31 July 2015 and at that date there was a deficit of £40.2 million. Actuarial valuations are carried out every three years, and so work on the next one (as at 31 July 2018) will be starting in the summer, with the results expected next year.

In the meantime, the Scheme receives annual updates to the funding position each year, based on approximate calculations.

The results of the actuarial valuation and the actuarial updates in 2016 and 2017 are set out in the Scheme Actuary's reports dated 3 October 2016, 21 October 2016, and 1 November 2017 respectively, and the headline figures are set out in the table below. Further details on how to obtain copies of these reports are set out at the end of this Statement.

Funding position	31 July 2015 (£m)	31 July 2016 (£m)	31 July 2017 (£m)
Assets	169.7	188.5	209.7
Liabilities	209.9	240.7	249.2
Shortfall	40.2	52.2	39.5
Funding level	81%	78%	84%

How has the financial position of the Scheme changed since the date of the last summary funding statement?

As can be seen in the table above, the funding position of the Scheme can vary substantially depending upon market conditions. Over the period since the actuarial valuation in 2015, the cost of providing pensions has increased significantly due to reduced expectations for future investment returns, and higher expectations for future inflation – much of this effect was in the year after the valuation, leading to a higher shortfall being shown in 2016.

On the other hand investments have performed strongly – particularly in the year to 31 July 2017 (the second year), and so overall, the financial position is slightly improved in 2017 compared to the actuarial valuation in 2015.

How are the Scheme's assets invested?

The Trustees have set a benchmark for investing approximately 35% of the Scheme's assets in a diversified portfolio of global equities, with approximately 15% invested in a diversified portfolio of pooled commercial properties funds and 20% in a mixture of target return funds. The remainder of the Scheme's assets are held in inflation linked government bonds and a range of credit holdings via pooled funds. Subject to certain restrictions imposed by the Trustees, the day to day management of the Scheme's assets has been delegated to their investment managers. The Trustees' investment strategy is set out in the "Statement of Investment Principles" which is available on request.

Role of the Trustees

The Scheme is set up under trust and looked after by Trustees who are responsible for paying the benefits provided by the Scheme, investing the Scheme's assets and ensuring that the Scheme is properly funded.

The benefits provided by the Scheme are described in the Scheme's Trust Deed & Rules and the Scheme Booklet.

The Scheme's assets are looked after by the Trustees, on behalf of the members, and are kept separate from those of the University. The main assets of the Scheme are invested collectively; they are not invested in individual funds for each member.

The Trustees rely on the financial support of the University to ensure that the Scheme has enough money to provide the promised level of benefits. Unfortunately, the cost of providing final salary pension benefits cannot be predicted with any certainty; it depends on what happens in the future such as investment returns and how long people live. Therefore, the amount of money required will vary depending on how these things turn out in practice.

Role of the Scheme Actuary

The Scheme Actuary to the University of Southampton Pension and Assurance Scheme for Non Academic Staff is currently Paul Hamilton of Barnett Waddingham LLP, who is an independent professionally qualified actuary appointed by the Trustees. The Scheme Actuary carries out the actuarial valuations of the Scheme every three years, which determines whether there is a shortfall in the scheme, and the contributions payable to meet future benefits, and pay off the shortfall.

What contributions are being paid to the Scheme at the moment?

Following the 2015 actuarial valuation it was decided that active member contributions would remain at 6.35% of Pensionable Salaries.

Active members have the option of paying more ("Additional Voluntary Contributions", or "AVCs") into a money purchase scheme with Prudential which are held in separate funds for each individual. In addition, the Scheme previously allowed active members to pay AVCs to purchase extra service within the Scheme. This option is no longer available, except that members who had taken up this opportunity can continue to do so.

The University currently pays total contributions at the rate of 17.25% of total Pensionable Salaries for all active members. This includes 12.15% of Pensionable Salaries in respect of future Scheme benefits and an additional 5.1% of Pensionable Salaries, paid with the aim of clearing the ongoing deficit in the Scheme by 30 June 2026.

When will the contribution rate be reviewed?

The next actuarial valuation is to be carried out with an effective date of 31 July 2018 and the contribution rates will be reviewed as part of this exercise. The statutory deadline for completing this valuation is 31 October 2019.

Has the University received any payments from a surplus in the Scheme?

No payments have ever been made to the University from a surplus within the Scheme.

How is the actuarial valuation carried out?

Actuarial valuations are carried out on both an "ongoing" basis and a "winding up" basis.

The "ongoing" basis assumes that the Scheme continues in its present form and has the continued financial support of the University. It is the basis used by the Trustees to fund the Scheme. The Scheme Actuary looks at how much money is in the Scheme now and estimates how much will be needed to pay pensions in the future based on a number of assumptions such as future inflation, investment returns and how long members will live. The "winding up" basis assumes that the Scheme is immediately wound up and members' benefits are secured by purchasing individual annuity policies from an insurance company. Therefore, the winding up position depends on the cost of buying these annuities. The cost of buying annuities is usually significantly higher than the value placed on the benefits for "ongoing" purposes. This is because insurance companies take a very cautious view of the future and invest very conservatively. In addition, insurance companies are trying to make a profit. By contrast, the Trustees invest some of the Scheme's assets in equities and assume that, over the long term on an "ongoing" basis, these investments will provide higher returns than more cautious investments such as government bonds. The winding-up basis is used to estimate the deficit that would need to be recovered from the University in the event of the Scheme winding-up.

What happens if the Scheme winds up?

If the Scheme winds up the University has a statutory obligation to ensure that the Scheme has enough money to buy individual annuity policies from an insurance company for all members of the Scheme. If the University is not able to do this because it is insolvent the Scheme should be protected by the Pension Protection Fund. The Pension Protection Fund is a compensation scheme set up by Government to protect pension schemes in the event of employer insolvency.

The Pension Protection Fund should protect a significant proportion of your benefits but it would not pay your pension in full. Further information on the benefits it will provide and other useful information is available on the Pension Protection Fund website at www.pensionprotectionfund.org.uk. Or you can write to the Pension Protection Fund at Renaissance, 12 Dingwall Road, Croydon, Surrey, CR0 2NA.

On a "winding up" basis (i.e. if the Trustees cease to look after the Scheme, and an insurance company would take over responsibility for paying benefits), the estimated deficit as at 31 July 2015 was £185 million. This is a theoretical calculation which must be carried out as part of the actuarial valuation process.

Please note that this does not mean that the University is currently considering winding up the Scheme. For the avoidance of doubt, winding up the Scheme is very different to closing the Scheme. The recent consultation process run by the University looked at options for closing the Scheme, but was not suggesting the Scheme wind up – a closed scheme can continue to run, looked after by the Trustees without needing to wind up

Where can I get more information?

If you have any other questions, or would like any more information, please contact us at the address below. The following additional documents are available on request:

The Statement of Investment Principles - *this explains how the Trustees invest the money paid into the Scheme.*

The Statement of Funding Principles - *this explains the Trustees' approach to funding the Scheme.*

The Schedule of Contributions - *this shows how much money is being paid into the Scheme.*

The Annual Report and Accounts - *this shows the Scheme's income and expenditure in the 12 months up to 31 July each year. A copy is available at:*

<http://www.southampton.ac.uk/finance/services/index.page>

Valuation Report - *the full report on the Actuarial Valuation following the Actuary's assessment of the Scheme's financial position at 31 July 2015.*

Actuarial Update Report – *the full report on the Actuarial Update following the Actuary's assessment of the Scheme's financial position at 31 July 2016.*

Actuarial Update Report – *the full report on the Actuarial Update following the Actuary's assessment of the Scheme's financial position at 31 July 2017.*

The University of Southampton Pension and Assurance Scheme for Non Academic Staff Booklet (*you should have been given a copy when you joined the Scheme, but further copies are available at: <http://www.southampton.ac.uk/finance/services/index.page>*).

An Annual Benefit Statement – *Benefit Statements for the 2018 scheme year are due to be issued to active members during November 2018. If you are not already in receipt of a pension from the Scheme (and have not received a benefit statement in the previous 12 months) you can ask for a statement that provides an illustration of your likely pension.*
