Programme Specification

BM 6 Programme (2020-21)

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution
University of Southampton

Teaching Institution
University of Southampton

Mode of Study
Full-time

Duration in years
6

Accreditation details
General Medical Council (GMC)

Final award
Bachelor of Medicine, Bachelor of Surgery

Name of award
BM 6 Programme

Interim Exit awards
Bachelor of Medical Sciences
Certificate of Higher Education (CertHE)
Diploma of Higher Education (DipHE)

FHEQ level of final award
Level 6

UCAS code
A102

Programme code
5251

QAA Subject Benchmark or other external Medicine 2002 reference

Programme Lead
Sally Curtis (sac3)

Programme Overview

Brief outline of the programme
The BM 6 programme is a 6-year widening access programme. It includes an additional year of study, Year 0, which must be successfully completed before students join Year 1 to study alongside BM 5 students on the common five-year programme.

As well as meeting all of the requirements of the University, the BM programmes at Southampton all lead to the qualification of Bachelor of Medicine, Bachelor of Surgery, which, as a Primary Medical Qualification accredited by the UK General Medical Council (GMC), enables graduates to gain provisional registration with the GMC and apply to work in the National Health Service as a Foundation doctor. Information about provisional registration can be found at the GMC website:
The GMC is planning a formal assessment that UK medical graduates would need to pass in order to be granted registration with a licence to practise. The GMC envisages that students in Final Year in 2022-23 will need to pass a Medical Licensing Assessment before the GMC will grant them registration with a licence to practise. Further details are available from the GMC website.

The programme fulfils all of the standards required by the GMC as published in the guidance documents produced by the GMC in relation to Undergraduate Medical Education (UME). The learning outcomes for the programme are aligned with Outcomes for Graduates (2018) produced by the GMC and all aspects of the programme design, delivery and management meet the standards and requirements set out in Promoting Excellence: Standards for Medical Education and Training. The professional values students must meet and how we deal with concerns about students’ fitness to practise are in line with Professional Behaviour and Fitness to Practise: Guidance for Medical Schools and their Students.

All students who successfully complete the programme receive an integrated unclassified Bachelor of Medical Science Hons degree in addition to their Bachelor of Medicine, Bachelor of Surgery Degree. Selected students who successfully apply to transfer onto the BM with integrated Masters in Medical Science (MEdSc) programme do not receive a BMedSc Hons degree but receive a Masters in Medical Science instead (see separate programme specification). Students may also choose to intercalate between years 3 and 4 to study for a Bachelor of Science degree at another institution.

All of the BM programmes are underpinned by three key educational principles which have both informed and guided their development. These are that the curriculum should:

- enable students to relate their learning to future practice;
- encourage students to understand concepts and principles rather than merely reproduce factual knowledge;
- encourage students to adopt independent thought and self-direction in learning.

The Southampton curriculum is designed to be integrated, systems-based and spiral in nature, with clinical context throughout the programme, including early patient contact in years 1 and 2 with GP and hospital placements and a Health Care Support Worker placement in year 2. The Faculty of Medicine has an outstanding reputation for research and offers a research-embedded curriculum to its undergraduates with a 16-week Research project module in year 3 culminating in a conference presentation and a written dissertation. From January of year 3 students are on clinical placement culminating in final year with a longitudinal placement in a single centre for clinical modules in surgery, medicine and attending a local practice in primary care. As students progress through the course they are expected to become increasingly independent and self-directed in their learning.

Due to the nature of placement-based learning the exact learning of each student is always going to differ so whilst we will ensure that students all receive the same broad opportunities for learning it is the responsibility of the student to make the most of the opportunities provided, identify gaps in their knowledge and skills, and be proactive in securing experiences and/or resources to help them fill these gaps.

Your contact hours will vary depending on your module/option choices. Full information about contact hours is provided in individual module profiles.

**Learning and teaching**

The Year 0 curriculum is specifically designed to fill the attainment gap whilst developing confidence and other key skills to smooth the transition into Year 1. The main teaching sessions are largely interactive and are supported by additional weekly tutorials. Students will also experience a range of observational healthcare placements in both primary and secondary care settings. The placements provide an insight into multidisciplinary teamworking and the patient experience, which alongside taught sessions facilitates professional development.

In BM Year 1 a wide range of learning and teaching methods is employed including lectures, tutorials, workshops, practical classes and guided self-study using online learning. There is a structured clinical module, Medicine in Practice 1, providing early patient contact including the Birth Experience.

In BM Year 2 there is a greater contribution of clinical contact within the Medicine in Practice 2 module including the Health Care Support Worker placement.

The research project that starts BM Year Three is a 16-week study of scientific research, clinical research or service evaluation.
The remainder of the programme is mainly clinical in a wide range of healthcare placements. These are complemented by additional modules such as Clinical Ethics & Law, and Personal & Professional Development.

Clinical placements currently take place across the South of England and Channel Islands from Dorchester in the West and Chichester to the East, Jersey & the Isle of Wight to the South and Camberley, Guildford and Basingstoke to the North. Students are likely to encounter a diverse range of patients from all backgrounds and as such will be well prepared as future doctors to address the health needs of the population. Even when our students are outside Southampton on placement, they remain part of the Faculty of Medicine and are well supported by both the administrative team and the pastoral team of experienced senior tutors.

Unless students have significant personal circumstances (criteria available in the Undergraduate Handbook) they will be expected to study at the site at which they have been allocated.

Whilst Years 1 and 2 mostly follow the University Semester calendar, the rest of the programme does not. In the later years students must prepare for shorter vacations with teaching and assessments outside University timeframes (term dates and assessment dates are published well in advance in the Undergraduate Handbook). Wednesday afternoons are usually kept free for students to participate in sporting commitments for the first three years of the programme only.

Doctors work in shift patterns and rotas throughout much of their working lives and to prepare students for such working once they graduate, throughout their programme they will be expected to undertake placements in the evenings, nights and at weekends.

Assessment

The Faculty’s assessment policy is that all assessments will be offered formatively before they are undertaken summatively. The range of assessments reflects the range of learning outcomes and includes: multiple choice examinations, written problem-solving examinations, practical papers, written reports, reflective writing; learning log books and clinical assessments, which usually take the form of Objective Structured Clinical Examinations (OSCE) and Assessments of Clinical Competence (ACC). Students are also required to demonstrate competence in practical procedures and basic and intermediate life support to be able to graduate (details of which are available in our Undergraduate Handbook and within module profiles.)

Progress from one year of the programme to the next will depend upon the successful completion of the appropriate modules, and freedom from health, behavioural and conduct problems relevant to future employment as a medical practitioner. Further details are available in the Fitness to Practise Policy.

Special Features of the programme

Year 0: Students entering Year 0 are welcomed from very diverse backgrounds traditionally underrepresented in medicine. The relatively small group of students together with an interactive teaching approach creates a culture of active and therefore deep learning. Professional development is a major feature of, which alongside high levels of academic and personal support, helps students develop the skills required for success in future study and practice.

Research Opportunities, BMedSc & Option of MMedSc: All students undertake a research project in year three leading to the award of a BMedSc as well as the BMBS. Students will be able to select their BM Year Three research project from a wide range of research fields, providing them with further opportunities to explore areas of interest. There is also the opportunity to study for a MMedSc award by applying to transfer onto the BMBS with Integrated MMedSc programme.

Patient Contact from the outset: Throughout Year 0 students experience early patient contact, provided through sessions at 3 healthcare placements. These placements are delivered in both primary and secondary healthcare settings. Early patient contact takes place in the Medicine in Practice module in BM years 1 and 2 and enables the students to experience clinical medicine in primary care and the hospital setting. In addition all students are expected to work with Health Care Support Workers for a number of weekend shifts to enable them to understand the working environment of a hospital ward and to gain confidence in talking to patients and understanding their basic care needs.

Student Choice & Humanities Teaching: There are Student Selected Units in years 1, 3 and 5 provide students with opportunities to explore areas that particularly interest them; Students undertake student selected units in Humanities and Public Health in year 1. A range of student selected units are open to students in years 3 including the option to study a language. The BM Year Five SSU offers a chance to explore areas of clinical interest for their future career.

Student Support: Southampton has a very strong reputation for its excellent student support mechanisms. All students will be allocated a personal academic tutor during their time on their course, and there are a range of support services offered by the University. In addition
to this, the Medical Faculty in Southampton also employs a team of experienced Faculty based senior tutors who can provide additional support for medical students during their course.

The Programme offers a flexible and inclusive approach to learning to enable any student who meets the entry requirements to access the curriculum and demonstrate achievement of all the intended learning outcomes. Reasonable adjustments are made for individual learners as required; and in this the Faculty follows GMC guidance "Gateways to the Profession".

Student Engagement: We are proud of our level of student engagement in the Faculty of Medicine in all areas of the course from management of the medical faculty, curriculum design and review, delivery of the teaching and assessment, research and outreach activities. We see students as partners in the running of our programmes and were awarded an International ASPIRE award for our Excellence in Student Engagement.

Study Abroad Opportunities: All students have the opportunity to undertake study abroad in the Clinical Elective module in BM Year Five.

This programme involves mandatory placements in all years. Almost all placements are organised by the Faculty. However, you will need to organise your own placement for the Electives module in BM Year Five. Where arranged by the Faculty, placements will usually be based in NHS trusts and GP practices.

Please note: As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration; however, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our Disclaimer to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's Quality handbook.

Educational Aims of the Programme

The programme aims to help students become NHS Foundation Year One doctors, as graduates with the capability to develop, learn and work in a wide variety of settings in the context of changing healthcare systems.

Within this broad aim some of the key specific aims are to enable students after graduation to:
• Undertake the duties and further studies appropriate to an NHS Foundation Year One doctor
• Develop the capability to follow a career in any branch of medicine
• Become a competent practitioner in a modern, changing health service and society
• Think critically and develop the ability to learn independently
• Develop the key skills and attitudes which underpin high quality professional practice;
• Work in a multidisciplinary team, valuing and respecting colleagues.

It is essential that students understand that learning to be a doctor requires them to develop professional behaviours as well as knowledge and skills; we expect this to start from the beginning of the programme and to develop as they progress.

The programme delivers the main learning outcomes under the framework provided through the GMC's Good Medical Practice which sets out the principles of professional practice that form the basis of medical education.

Patients must be able to trust doctors with their lives and health. To justify that trust medical students and doctors must show respect for human life and make sure their practice meets the standards expected of them in four domains:

Knowledge, skills and performance
• Make the care of the patient their first concern.
• Provide a good standard of practice and care.
• Keep their professional knowledge and skills up to date.
• Recognise and work within the limits of their competence.

Safety and quality
• Take prompt action if they think that patient safety, dignity or comfort is being compromised.
• Protect and promote the health of patients and the public.

Communication, partnership and teamwork
• Treat patients as individuals and respect their dignity.
• Treat patients politely and considerately.
• Respect patients’ right to confidentiality.
• Work in partnership with patients.
• Listen and respond to patients’ concerns and preferences.
• Give patients the information they want or need in a way they can understand.
• Respect patients’ right to reach decisions with their doctor about their treatment and care.
• Support patients in caring for themselves to improve and maintain their health.
• Work with colleagues in the ways that best serve patients’ interests.

Maintaining trust
• Be honest and open and act with integrity.
• Never discriminate unfairly against patients or colleagues.
• Never abuse the patient’s or the public’s trust in the profession.

Medical students are personally accountable for their professional practice and must always be prepared to justify their decisions and actions.

Programme Learning Outcomes

Knowledge and Understanding

On successful completion of this programme you will have knowledge and understanding of:

A1. Apply to medical practice biomedical scientific principles, method and knowledge relating to: anatomy, biochemistry, cell biology, genetics, immunology, microbiology, molecular biology, nutrition, pathology, pharmacology and physiology.
A2. Apply psychological principles, method and knowledge to medical practice.
A3. Apply social science principles, method and knowledge to medical practice.
A4. Apply to medical practice the principles, method and knowledge of population health and the improvement of health and healthcare.
A5. Apply scientific method and approaches to medical research.

Teaching and Learning Methods

The UK General Medical Council defines the learning outcomes of undergraduate medical programmes in its ‘Outcomes for Graduates’ and the programme learning outcomes therefore align with these.

• Teaching is integrated so that the natural, social and behavioural scientific disciplines are taught together in a clinical context.
• Three themes run through the programme: Communication, Diversity, and Team Working, Leadership and Patient Safety.
• Specific teaching and learning methods used include: lectures, tutorials, practicals, guided self-study, problem solving scenarios, role play, projects, group work, portfolios, study packs, eLearning, and patient-based learning. Clinical teaching takes place from the start of the programme, and occurs in a wide variety of NHS and non-NHS settings.
Assessment Methods

A range of assessment methods are used depending on the learning outcomes being assessed.

- Coursework will include: essays, reports, posters, project reports and presentations
- Examinations will include written papers and assessments of clinical performance.

Transferable and Generic Skills

On successful completion of this programme you will be able to:

C1. apply theoretical knowledge to practical situations in a wide variety of settings;
C2. gather information from a range of sources to enable you to develop a comprehensive understanding of complex situations;
C3. assess complex problems (including high pressure and emergency situations) and be able to develop an action plan to manage them;
C4. demonstrate high level communication skills;
C5. negotiate with a wide range of people;
C6. use computers and other information sources to enable you to undertake a range of tasks;
C7. understand and demonstrate confidentiality in the handling of data;
C8. show a reflective approach to work and learning;
C9. teach peers and colleagues
C10. manage your time and prioritise tasks, working autonomously where appropriate;
C11. respond to the outcome of your own appraisal and contribute to the development and appraisal of colleagues;
C12. work effectively as a member of a multidisciplinary team, respecting the contributions of all team members;
C13. deal effectively with uncertainty and change;
C14. demonstrate understanding of health and safety, quality assurance and risk management in the workplace;
C15. demonstrate awareness of the importance of the use and prioritisation of resources.

Teaching and Learning Methods

- All modules will enable students to learn how to apply theoretical knowledge to a wide range of settings and to gather information to help understanding of problems. This skill will be further developed by learning to take histories from patients. In clinical modules in particular students will learn the importance of time management, prioritisation, multidisciplinary teamworking, management of uncertainty and change, and use of resources.
- Throughout the programme, students will use a portfolio approach to reflection, supplemented by tutorials and an annual PPDR (Personal Performance and Development Review)
- Students will participate in tutorials and undertake peer teaching sessions.

Assessment Methods

- Assessment of these outcomes will be incorporated into the assessments of category A, D and E learning outcomes.
Subject Specific Practical Skills

On successful completion of this programme you will be able to:

D1. Carry out a consultation with a patient.
D2. Diagnose and manage clinical presentations.
D3. Communicate effectively with patients and colleagues in a medical context.
D4. Provide immediate care in medical emergencies.
D5. Prescribe drugs safely, effectively and economically.
D6. Carry out practical procedures safely and effectively
D7. Use information effectively in a medical context.

Teaching and Learning Methods

• Most teaching will be patient-based, supplemented by clinical skills work. There will also be tutorials, lectures, role play, group work, eLearning, case-based discussions, presentations and clinical skills simulations.
• There is early patient contact through the Medicine in Practice modules.
• A wide range of clinical placements is available to enable students to become confident in aspects of clinical medicine.

Assessment Methods

A range of assessment methods is used depending on the learning outcomes being assessed.

• Coursework can include: learning log books, reflections, clinical skills sign offs, case-based discussions and presentations.
• Examinations will include written papers and assessments of clinical performance.
• There will be formative assessment of clinical performance throughout clinical modules, and summative clinical assessments.

Assessments of clinical performance take three main forms:
• the Objective Structured Clinical Examination (OSCE).
• the Assessment of Clinical Competence (ACC) assessments undertaken during clinical modules in a continuous manner.
• sign off of competence in practical procedures, basic and intermediate life support.

Disciplinary Specific Learning Outcomes

On successful completion of this programme you will be able to:

E1. Behave according to ethical and legal principles.
E2. Reflect, learn and teach others.
E3. Learn and work effectively within a multi-professional team.
E4. Protect patients and improve care.

Teaching and Learning Methods

- Teaching is integrated so that professionalism skills are taught alongside knowledge and practical skills.
- Explicit teaching and learning methods used include: lectures, tutorials, guided self-study, eLearning, problem-solving scenarios, reflection, group work, learning log books and case-based discussions.
- Role modelling by staff and colleagues is a key method of teaching and learning in this area.

Assessment Methods

- Assessment of professionalism is embedded in early years modules and all clinical module assessments, as well as in OSCE and ACC assessments.

Programme Structure

The programme structure table is below:

Information about pre and co-requisites is included in individual module profiles.

Where optional modules have been specified, the following is an indicative list of available optional modules, which are subject to change each academic year. Please note in some instances modules have limited spaces available.

Part I

Information about all Parts/Years of the Programme:

The BM 6 programme delivers a comprehensive range of opportunities for students to meet the learning outcomes and graduate as a doctor equipped to practise in the Foundation programme. Medicine is by nature a wide ranging discipline and students will not be able to study every aspect of every specialty as an undergraduate. However, the course is structured to provide students with a solid base from which to progress into the Foundation Programme.

The Year 0 curriculum is well matched to the demands of the subsequent years. Students will learn by understanding principles and concepts and contextualising their learning by applying it in medical and patient-focussed scenarios. The curriculum integrates a range of relevant disciplines, encouraging students to learn across levels (cells, tissues, systems and the whole individual).

The programme is split into four distinct phases. The Fundamentals of Medicine phase takes place over the first three years and is made up of six University semesters; the Progression into Clinical Practice Phase takes place in BM Year 3. The Developing Clinical Practice phase takes place through BM Year 4 and the first half of BM Year 5 and ends with the BM Year 5 examinations. The final phase – Preparing for Independent Practice - takes place in the second half of BM Year 5 and finishes with Graduation.

There are three themes that run through the programme: Communication, Diversity, and Teamworking, Leadership & Patient Safety. Learning around these themes is integrated throughout the programme. Clinical Skills are taught in the Medicine in Practice modules initially and developed further in the clinical skills components of the clinical modules.

The programme is modular; modules are assigned credits for the European Credit Transfer Scheme (ECTS). Details of the modules can be found in the table below. The programme is totally integrated to award the final BM BS honours degree and the intermediate BM edSc Ordinary honours degree. A BM edSc honours degree can only be awarded alone as an exit degree. There are defined exit points with appropriate academic awards after successfully completing parts of programme, which students may apply for if they leave the programme (see table below). All modules on the programme are core and must be passed in order to progress and graduate. There cannot be compensation between any modules in any part of the programme. Only students who have completed the intermediate BM edSc (Hons) award will progress to the BM BS.
A diagrammatic illustration of the curriculum can be found in a separate “Curriculum Plan” document. Further details of each module can be found in their individual respective Module Profiles.

Highly performing students who over the programme consistently achieve excellent assessment scores will be awarded a BMBS degree with distinction. Distinctions are also available for individual phases of the programme. Further details regarding the criteria for award of distinction are available in the Undergraduate Handbook available on Blackboard.

Students will be eligible for an interim exit award if they complete part of the programme but not all of it, as indicated in the table below.

Progress from one year of the programme to the next will depend upon the successful completion of the appropriate modules, and freedom from health, behavioural and conduct problems relevant to future employment as a medical practitioner. Further details are available in the Fitness to Practise regulations.

The programme follows the University’s regulations as set out in the University Calendar with approved variations to the General Academic Regulations published in the Faculty of Medicine Programme Regulations.

Where a repeat year is allowed, or where a student has suspended their study, a maximum programme length may apply. As governed and determined by the student progress committee, the maximum total duration of a student’s programme (including any interruptions through suspension or repeat attempts) is no more than 8 calendar years for students on this BM6 programme and students who are allowed repeat years or suspensions will be informed of this.

Students who have failed module(s) and are entitled to further attempts will be required to undertake that further attempt at the next available opportunity which may be the next academic year (i.e. repeating the entire year). Students who are required to undertake re-assessment in excess of the weeks available will be referred to the Student Progress Committee and may be required to suspend from the programme and return in the following academic session.

Part IV

Students who successfully pass 30 ECTS in Part IV (BM Year 3) are eligible for an Exit Award of a Bachelor of Medical Sciences Ordinary degree.

Students who successfully pass 60 ECTS in BM Year 3 which must include the Research Module (and any combination of other modules from BM Year 3) are eligible for an Exit Award of a Bachelor of Medical Sciences Honours degree (unclassified)

Students who successfully pass all modules in BM Year 3 are eligible for an Intermediate Award of a Bachelor of Medical Sciences Honours degree (unclassified).

Students who successfully pass all modules in BM Year 3 will have attained:

270 credits including 90 at level 6, 60 at level 5, 60 at level 4 and 60 at level 3
180 ECTS allocated to BMedSc (Hons) including 60 at level 6, 60 at level 5 and 60 at level 4. Level 6 credits must include Research Project and 37.5 Credits from any combination of other modules.
30 ECTS at level 6 allocated to BM BS
(remaining modules not allocated to BMedSc (Hons))

Progression Requirements

The programme follows the University’s regulations for Progression, Determination and Classification of Results: Undergraduate and Integrated Masters Programmes and Progression, Determination and Classification of Results: Postgraduate Master’s Programmes as set out in the University Calendar: http://www.calendar.soton.ac.uk/sectionIV/sectIV-index.html
Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:

- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources
- high speed access to online learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure filestore and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library.
- Enabling Services offering support services and resources via a triage model to access crisis management, mental health support and counselling. Support includes daily Drop In at Highfield campus at 13.00 – 15.00 (Monday, Wednesday and Friday out of term-time) or via on-line chat on weekdays from 14.00 – 16.00. Arrangements can also be made for meetings via Skype.
- assessment and support (including specialist IT support) facilities if you have a disability, long term health problem or Specific Learning Difficulty (e.g. dyslexia).
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards
- Career and Employability services, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV
- Other support that includes health services (GPs), chaplaincy (for all faiths) and ‘out of hours’ support for students in Halls and in the local community, (18.00-08.00)
- A Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Students’ Union provides

- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students' views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

Specifically BM6 students:

- Receive financial support in the form of a £1,000 bursary in Year 0
- Are eligible for two years’ accommodation in the University’s halls of residence.
- Receive regular high quality feedback in Year 0 through weekly small group tutorials and individualised feedback on all assessments

Associated with your programme you will be able to access:

- a Personal Academic Tutor
- a Senior Tutor identified for each phase of the programme
- in your Foundation module, you will have regular tutorials with a Foundation Tutor, to help you adjust to University level study specific to Medicine
- Faculty computer workstations in the Health Services library at Southampton General Hospital. There is also access to University workstations in most NHS Trusts where you undertake clinical modules
- whilst undertaking clinical modules, you have access to support from the Module leader, the Lead consultant of your placement and their team, and the Associate Clinical Sub dean in the Trust where you are placed.
- study skills support which is provided by module leaders as required.

Methods for evaluating the quality of teaching and learning
You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing student evaluation questionnaires for each module of the programme
- Acting as a student representative on various committees, e.g. Staff: Student Liaison Committees, Faculty Programmes Committee OR providing comments to your student representative to feedback on your behalf.
- Serving as a student representative on Faculty Scrutiny Groups for programme validation
- Taking part in programme validation meetings by joining a panel of students to meet with the Faculty Scrutiny Group

The ways in which the quality of your programme is checked, both inside and outside the University, are:

- Regular module and programme reports which are monitored by the Faculty
- Programme validation, normally every five years.
- External examiners, who produce an annual report
- Accreditation and inspection by the General Medical Council, who monitor and evaluate not just the curriculum, assessments and clinical placements; but also the staff development of all teachers, and the student support which we provide.
- A national Research Assessment Exercise (our research activity contributes directly to the quality of your learning experience)
- Higher Education Review by the Quality Assurance Agency for Higher Education
- We further monitor the quality of your clinical placements by robust quality monitoring and enhancement activities which include regular visits and evaluation of all NHS trusts and other clinical settings where you are placed.

Further details on the University's quality assurance processes are given in the [Quality Handbook](#).

**Career Opportunities**

Graduates from all BM programmes have a qualification recognised by the UK General Medical Council and are entitled to provisional registration with the GMC. The qualification is the foundation from which you can progress into specialist training for any branch of medical practice, including the academic pathways; which can be in the UK, Europe or international. Some graduates choose not to pursue a clinical career, and the high level generic skills achieved on completion of the programme together with the clinical background are such that a wide range of other careers are accessible to holders of the BMBS and BM edSc degrees.

**External Examiner(s) for the programme**

- Name: Dr Margaret Barnes-Davies - University of Leicester
- Name: Dr Craig Cunningham - Dundee University
- Name: Dr Clare J Ray - University of Birmingham
- Name: Mr Thanesan Ramalingam - William Harvey Hospital
- Name: Dr Gerard Browne - University of Central Lancashire
Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners’ reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their Personal Academic Tutor in the first instance.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook.
Appendix 1:

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme also have to pay for:

### Additional Costs

<table>
<thead>
<tr>
<th>Type</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clothing</strong></td>
<td>Students will need to purchase a white coat for use in the Anatomy Laboratory. This can be purchased from any source. Lab coats are available from the SUSU Shop priced £12.50 (price at March 2019).</td>
</tr>
</tbody>
</table>
| **Conference expenses**     | Accommodation  
Students may have the opportunity to attend an academic conference during their studies. Attendance is optional. Students would be expected to pay for the costs of any accommodation associated with the conference if they choose to attend.  
Travel  
Students may have the opportunity to attend an academic conference during their studies. Attendance is optional. Students would be expected to pay for the costs of any travel associated with the conference if they choose to attend. |
| **Parking costs (including on placements at hospitals)** | See placements travel costs.                                                                                                                   |
| **IT**                      | Across all campuses and most halls of residence approximately 1700 computer workstations are available. Students may wish to purchase their own desktop/laptop/tablet computer to support their studies. This is entirely optional.|
| **Stationery**              | Students will be expected to provide your own day-to-day stationery items (e.g. pens, pencils, notebooks, etc). Any specialist stationery items will be specified under the Additional Costs tab of the relevant module profile. |
| **Textbooks**               | Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source.  
Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively students may wish to purchase their own copies. Although not essential reading, students may benefit from the additional reading materials for the module. |
| **Placements (including Study Abroad Programmes)** | Accommodation: Students will need to pay for any accommodation required as part of your Elective.  
Insurance: Students will need to pay for insurance if they choose to undertake their Elective outside the UK.  
Medical insurance: Students will need to pay for medical insurance if they choose to undertake their Elective outside of the UK.  
Travel costs: Students will need to pay £100 per annum towards travel costs associated with clinical placements. They will need to pay for any travel costs required as part of your Elective.  
Immunisation/vaccination costs: Students will be expected to pay for any immunisation/vaccination costs required to ensure they have a complete immunisation/vaccination history prior to commencing the programme. Further information on required immunisations/vaccinations is provided to those applicants made an academic offer of study. |
Students will need to pay for any immunisation/vaccination costs associated with overseas travel if they choose to undertake their Elective outside of the UK.

Disclosure and Barring Certificates or Clearance: Students are expected to pay for an enhanced Disclosure and Barring Service Clearance check, is payable on induction (cost £51 as of March 2019). Students may also be required to undertake an enhanced DBS clearance check if they choose to undertake an Elective within the UK.

Approved Calculators

Candidates may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers. The University approved models (prices from £15) are Casio FX85GT (and Plus), Casio FX83GT (and Plus), Casio FX83ES or Casio FX570 (all models and Plus). This may be purchased from any source and no longer needs to carry the University logo.

Anything else not covered elsewhere

In your BM Year 5 students will need to sit the Situational Judgement Test (SJT). This test is required as part of the application process for the Foundation Programme, which follows directly after graduation. Students will normally be required to pay for their travel costs to sit this exam. Students will normally be required to pay for any travel costs associated with sitting the Prescribing Safety Assessment (PSA) in Southampton.

Medical Equipment and Materials: Fobwatch; stethoscopes;

Students will need to purchase a stethoscope. No specific make or model is required. It can be purchased from any source. Stethoscopes are available to buy during Faculty induction and prices range from £39 to £177. Students will need to purchase a fob watch with a second hand that can be pinned to clothing or put in a pocket, as students are not permitted to wear wrist watches in clinical areas. No specific make or model is required. It can be purchased from any source. Prices start from £1.50.

Printing and Photocopying Costs

In the majority of cases, coursework (e.g. essays, projects, dissertations) is likely to be submitted online. However, there may be some items that it is not possible to submit online and students will be asked to provide a printed copy at their own expense. For A4 (black-and-white), the University printing costs (in March 2019) are 4p (single-sided) or 7p (double-sided). Further details on University printing costs including other paper sizes and colour printing can be found here: http://www.southampton.ac.uk/isolutions/students/printing/

In some cases you'll be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University's Fees, Charges and Expenses Regulations in the University Calendar available at www.calendar.soton.ac.uk/

**Appendix 2:**

**SUMMATIVE SYNOPSIS ASSESSMENTS in BM Year 1 (BM 6 part II) and Year 2 (BM 6 part III)**

**YEAR 1:**

The Synoptic Assessment at the end of Year 1 (BM 6 part II) covers the learning outcomes of:

- Foundations of Medicine module (MEDI 1031)
- Locomotor module (MEDI 1033)
- Cardiopulmonary module (MEDI 1030)

<td>40 A/B stations (160 marks, approx. 40 min)</td>
<td>20%</td>
<td>Standard-set</td>
<td>10% below the standard-set pass-mark</td>
</tr>
</tbody>
</table>

Notes
1. Compensation is allowed between papers, provided the qualifying mark is achieved in each paper.
2. Referral method is a supplementary assessment of the same format as above.
3. Repeat Year (internal) is allowed

YEAR 2:
The Synoptic Assessment at the end of Year 2 (BM 6 part III) covers the learning outcomes of:
- Renal module (MEDI 2044)
- Nervous System module (MEDI 2046)
- Gastrointestinal module (MEDI 2042)
- Endocrine & Lifecycle module (MEDI 2043)
- Research in Medicine & Health (MEDI 2045)

<table>

</tbody>
</table>

Notes
1. Compensation is allowed between papers, provided the qualifying mark is achieved in each paper.
2. Referral method is a supplementary assessment of the same format as above.
3. Repeat Year (internal) is allowed

Compensation is available in each of the year one and year two (BM 6 part II) and (BM 6 part III) synoptic assessment (provided all qualifying marks are achieved) because the three synoptic papers together comprise a single assessment. Students failing to achieve one or more qualifying marks, or failing to achieve the weighted aggregate pass-mark (after compensation), will be offered a supplementary opportunity comprising three further synoptic papers; all three supplementary qualifying marks and the weighted aggregate pass-mark (after compensation) must be achieved to pass the supplementary assessment.
