

Programme Specification

MSc Sustainable Energy Technologies 2020/21

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution	University of Southampton
Teaching Institution	University of Southampton
Mode of study	Full time
Duration in years	1 years
Accreditation details	Accredited by Institution of Mechanical Engineers as meeting the requirements for Further Learning for a Chartered Engineer (CEng) candidate who has a partial CEng undergraduate first degree
Final award	Master of Science
Name of award	Sustainable Energy Technologies (3878)
Interim Exit awards	Postgraduate Certificate Postgraduate Diploma
FHEQ level of final award	Level 7
UCAS code	N/A
QAA Subject Benchmark or other external reference	QAA Subject Benchmark – Engineering 2015; Accreditation of Higher Education Programmes, Edition 3, Engineering Accreditation Board Characteristic Statement: Master’s Degree, QAA 2015
Programme Coordinator	Dr. Carlos Ponce De Leon Albarran
Date specification was written	November 2005 (K.H. Luo)
Date Programme was validated	April 2019
Date specification last updated	June 2019

Programme Overview

Brief outline of the programme

This programme aims to provide science or engineering graduates from a diversity of backgrounds with an academically challenging exposure to modern energy technologies for sustainable developments. The School of Engineering has strengths in a broad range of areas in energy research, including photovoltaics, fuel cells, energy storage and batteries, combustion, electrical power systems, wind, wave and tidal energy. The research carried out by academic staff provides direct input into a challenging and stimulating teaching programme and student research projects.

The programme is accredited by the Institution of Mechanical Engineers and meets the further learning requirements to become a Chartered Civil Engineer.

Learning and teaching

You are encouraged from an early stage to supplement and consolidate your understanding and knowledge by independent study. The MSc uses a broad range of learning and teaching methods. In a classroom environment these include lectures, short period breakout group tasks, interactive discussions and workshops. The ‘Democratisation of Energy, SESG6041’ and ‘Eling Tide Mill, SESG6041’ are good examples.

Fieldtrips provide real world insight, enabling students to translate concepts discussed in lectures to case study sites. Examples include, Fawley Power Station (SESG6041, Intro Module), Eling Tide Mill (SESG6041, Intro Module), BRE Innovation Park (CENV6148)

Assessment

Testing of the knowledge base and development of skills is through a combination of unseen written examinations and assessed coursework in the form of problem solving exercises, laboratory reports, design exercises, essays and individual projects.

Assessment methods are a mix of exams and coursework (LO EA6M, EA5M, EA7M) balanced between individual and group work. Exams enable students to demonstrate a comprehensive understanding of the scientific principles (LO SM7M). Questions are a mix of shorter problems assessing core understanding (LO SM7M, SM9M) and longer, open ended tasks where students have the ability to demonstrate a deeper understanding and critical thinking (LO SM8M).

The ability of students to present their work is assessed through poster presentations and individual and group formal presentations / reports (LO P11m, G1, G2, G3m, G4). Group work alongside the dissertation assesses management and research analysis skills (LO EA7M, D9M, D10M, D11M). Engineering practice is assessed through group work on specific briefs such as the Tide Mill and 2 countries to 80% renewables tasks (LO P9m, P10m, P11m). Sustainability and ethical practice and general skills are assessed throughout the programme, driven by the brief of numerous courseworks and the dissertation study (LO EL8M, EL9M, EL10M, EL11M, EL12M, EL13M, G1, G2, G3m, G4).

Special Features of the programme

There are a number of special features to the programme aimed at building a cohort identity, supporting students, particularly international, and improving the student experience and learning opportunity. These include:

1. Induction week activities, including a group outdoor activity aimed at promoting interaction between the students on the MSc Energy and Sustainability. Photo Challenge on day 1 of the introduction module (SESG6041).
2. This programme includes a number of workshops and field trips. These include the 3-day 'Democratisation of Energy' workshop where the challenges of delivering energy policy in terms of fairness, acceptability and cost are explored. Large group work tasks such as the 80% renewables by 2040 study for two countries enable students to apply and extend their knowledge to solve complex, multi-disciplinary problems.

Please note: As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration; however, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our [Disclaimer](#) to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's Quality handbook.

Educational Aims of the Programme

The aims of the programme are to:

- Provide you with a sound understanding of the fundamental principles, methods, analysis and synthesis in engineering design and applications appropriate to Sustainable Energy Technologies.
- Provide you with a range of specialist modules integrated within the structured learning environment, reflecting the internationally-renowned research expertise within the School, in order to broaden and deepen your educational experience.
- Enable your career pathway towards chartered engineer status.
- Offer you a degree structure that is relevant to industry and responsive to changes in technology and the needs of the community.
- Provide you with a supportive and intellectually stimulating environment that encourages an attitude of independent learning and enquiry, and fosters an ethos of lifetime learning and professional development.
- Offer you a choice of research projects which are supported by the research activities within the Faculty and stimulate individual innovation, self-assessment and teamwork skills required in engineering.
- Afford you the opportunity of applying theoretical knowledge gained on the programme through a substantial piece of research (dissertation).

Programme Learning Outcomes

The programme provides opportunities for you to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the areas detailed below. The programme learning outcomes have been developed with reference to the Subject Benchmark Statement for engineering (<https://www.gaa.ac.uk/docs/gaa/subject-benchmark-statements/sbs-engineering-15.pdf>) and the Characteristics Statement for Master's Degrees (https://www.gaa.ac.uk/docs/gaa/quality-code/master's-degree-characteristics-statement.pdf?sfvrsn=6ca2f981_10). The former of these is aligned with the Engineering Council publication Accreditation of Higher Education Programmes (AHEP): UK Standard for Professional Engineering Competence (third edition) ([https://www.engc.org.uk/engcdocuments/internet/Website/Accreditation%20of%20Higher%20Education%20Programmes%20third%20edition%20\(1\).pdf](https://www.engc.org.uk/engcdocuments/internet/Website/Accreditation%20of%20Higher%20Education%20Programmes%20third%20edition%20(1).pdf))

Knowledge and Understanding

Having successfully completed this programme you will be able to demonstrate knowledge and understanding of:

	Science and mathematics Engineering is underpinned by science and mathematics, and other associated disciplines, as defined by the relevant professional engineering institution(s). On graduation you will have achieved:
SM7	A comprehensive understanding of the relevant scientific principles of Sustainable Energy Technologies
SM8	A critical awareness of current problems and/or new insights most of which is at, or informed by, the forefront of aerodynamic and computation
SM9	Understanding of concepts relevant to Sustainable Energy Technologies, some from outside engineering, and the ability to evaluate them critically and to apply them effectively, including in engineering projects

	Design Design at this level is the creation and development of an economically viable product, process or system to meet a defined need. It involves significant technical and intellectual challenges and can be used to integrate all engineering understanding, knowledge and skills to the solution of real and complex problems. On graduation you will have the knowledge, understanding and skills to:
D9	Knowledge, understanding and skills to work with information that may be incomplete or uncertain, quantify the effect of this on the design and, where appropriate, use theory or experimental research to mitigate deficiencies
D10	Knowledge and comprehensive understanding of design processes and methodologies and the ability to apply and adapt them in unfamiliar situations

	Economic, legal, social, ethical and environmental context Engineering activity can have impacts on the environment, on commerce, on society and on individuals. On graduation you will have the skills to manage your activities and to be aware of the various legal and ethical constraints under which you are expected to operate, including:
EL8	Awareness of the need for a high level of professional and ethical conduct in engineering
EL9	Awareness that engineers need to take account of the commercial and social contexts in which they operate
EL10	Knowledge and understanding of management and business practices, their limitations, and how these may be applied in the context of Sustainable Energy Technologies
EL11	Awareness that engineering activities should promote sustainable development and ability to apply quantitative techniques where appropriate
EL12	Awareness of relevant regulatory requirements governing engineering activities in the context of Sustainable Energy Technologies
EL13	Awareness of and ability to make general evaluations of risk issues in the context of Sustainable Energy Technologies, including health & safety, environmental and commercial risk

	Engineering practice This is the practical application of engineering skills, combining theory and experience, and use of other relevant knowledge and skills. On graduation you will have achieved:
P9	A thorough understanding of current Sustainable Energy Technologies practice and its limitations, and some appreciation of likely new developments

P11	Understanding of different roles within an engineering team and the ability to exercise initiative and personal responsibility, which may be as a team member or leader
P12	Advanced level knowledge and understanding of a wide range of engineering materials and components

Teaching and Learning Methods

Acquisition of core knowledge and understanding is through lectures, seminars, tutorials, field and laboratory classes, computer classes, workshops, and independent study and research. You are encouraged from an early stage to supplement and consolidate your understanding and knowledge by independent study.

Assessment methods

Testing of the knowledge base is through a combination of unseen written examinations and assessed coursework in the form of problem solving exercises; laboratory reports design exercises, essays and individual and group projects.

Skills

Having successfully completed this programme you will be able to:

	Engineering analysis Engineering analysis involves the application of engineering concepts and tools to the solution of engineering problems. On graduation you will have achieved:
EA5	Ability to use fundamental knowledge to investigate new and emerging technologies
EA6M	Ability both to apply appropriate engineering analysis methods for solving complex problems in engineering and to assess their limitations
EA7	Ability to collect and analyse research data and to use appropriate engineering analysis tools in tackling unfamiliar problems, such as those with uncertain or incomplete data or specifications, by the appropriate innovation, use or adaptation of engineering analytical methods

	Design Design at this level is the creation and development of an economically viable product, process or system to meet a defined need. It involves significant technical and intellectual challenges and can be used to integrate all engineering understanding, knowledge and skills to the solution of real and complex problems. On graduation you will have the knowledge, understanding and skills to:
D11	Ability to generate an innovative design for products, systems, components or processes to fulfil new needs

	Engineering practice This is the practical application of engineering skills, combining theory and experience, and use of other relevant knowledge and skills. On graduation you will have achieved:
P10	Ability to apply engineering techniques taking account of a range of commercial and industrial constraints

	Additional general skills On graduation you will have developed transferable skills, additional to those set out in the other learning outcomes, that will be of value in a wide range of situations, including the ability to:
G1	Apply their skills in problem solving, communication, working with others, information retrieval, and the effective use of general IT facilities
G2	Plan self-learning and improve performance, as the foundation for lifelong learning/CPD
G3	Monitor and adjust a personal programme of work on an on-going basis
G4	Exercise initiative and personal responsibility, which may be as a team member or leader

	Discipline Specific Skills On completion of the Sustainable Energy Technologies Science programme you will be able to:
--	--

	Design and conduct an appropriate programme of work to set objectives for research in the context of sustainable energy technologies
	Use scientific and technical literature in support of research
	Apply fundamental knowledge and understanding of essential facts, concepts and principles relevant to Sustainable Energy Technologies in researching complex problems

Teaching and Learning Methods

Intellectual skills are developed through the teaching and learning activities. Analysis and problem solving skills are further developed through regular problem sheets issued by module lecturers and through small group teaching. Experimental, research and design skills are further developed through coursework exercises, laboratory work, and design and research projects. Individual feedback is provided on all work submitted. Appreciation of the practical applications of these skills is provided by interaction with industry through visiting lectures and industrial visits.

Assessment methods

Analysis and problem solving skills are assessed through unseen written examinations and problem based exercises. Experimental, research and design skills are assessed through laboratory reports, coursework exercises, project reports and oral presentations. Skills are formatively assessed through written reports and oral presentations, practical and laboratory reports. Summative assessment is through unseen examinations, extended essays, written reports and oral presentations, and completion of a research project.

Programme Structure

The University uses the European Credit Transfer Scheme (ECTS) to indicate the approximate amount of time a typical student can expect to spend in order to complete successfully a given module or programme, where 1 ECTS indicates around 20 nominal hours of study. Previously, Credit Accumulation and Transfer Scheme (CATS) points were used for this purpose where 1 CATS credit was 10 nominal hours of study. The University credit accumulation and transfer scheme is detailed at <https://www.southampton.ac.uk/calendar/sectioniv/index.page>

The teaching is structured on a semester pattern. You study modules comprising 90 ECTS (180 CATS). The course is only available full-time.

Each module is a self-contained part of the programme of study and carries a credit rating. The syllabus and assessment related to each module is detailed in the associated module profile.

The Programme Structure is outlined in Appendix 1. In Appendix 2 the modules contributing to meeting the different programme learning outcomes are listed.

Your contact hours will vary depending on your module/option choices. Full information about contact hours is provided in individual module profiles

Typical course content

In addition to the research project you will undertake 8 taught modules from the Sustainable Energy Technology programme catalogue.

The programme follows university guidelines for inclusivity and flexibility and provides an array of teaching and learning approaches that will enable any student who meets the entry requirements to access the curriculum and demonstrate achievement of all the intended learning outcomes.

Progression Requirements

The programme follows the University's regulations for [***Progression, Determination and Classification of Results: Postgraduate Master's Programmes***](https://www.southampton.ac.uk/calendar/sectioniv/index.page) as set out in the University Calendar <https://www.southampton.ac.uk/calendar/sectioniv/index.page>

Intermediate exit points (where available)

You will be eligible for an interim exit award if you complete part of the programme but not all of it, as follows:

Qualification	Minimum overall credits in ECTS/CATS credits	Minimum ECTS/CATS credits required at level of award
Postgraduate Diploma	at least 60/120	45/95
Postgraduate Certificate	at least 30/60	20/40

Programme outcomes for different exit points

Level 7 (MSc)	Much of the study undertaken at Masters level reflects research at the forefront of engineering. You will have shown originality in the application of knowledge, and you will understand how the boundaries of knowledge are advanced through research. You will be able to deal with complex issues both systematically and creatively, and show originality in tackling and solving problems individually and as part of a team. You will have the qualities needed for employment in circumstances requiring sound judgement, personal responsibility and initiative, in complex and unpredictable professional environments.
PGDip	You will have attained knowledge of research being undertaken by academic staff at the forefront of engineering. You will have shown that you are capable of applying knowledge to solve problems, and you will understand how the boundaries of knowledge are advanced through research. You will be able to deal with complex issues both systematically and creatively, and be able to contribute to solving problems individually and as part of a team. You will have the qualities needed for employment in circumstances requiring sound judgement and personal responsibility under the guidance of others, in complex and unpredictable professional environments.
PGCert	You will have been exposed to research being undertaken by academic staff at the forefront of engineering. You will have gained experience in applying knowledge to solve problems, and you will understand how the boundaries of knowledge are advanced through research. You will be able to deal with complex issues by following existing procedures, and will be able to contribute to solving problems individually and as part of a team. You will have some of the qualities needed for employment in circumstances requiring sound judgement and personal responsibility under the guidance of others, in complex and unpredictable professional environments.

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. Costs that students registered for this programme typically also have to pay for are included in Appendix 3.

Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:

- Library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these

resources. There is a wide range of online training and workshops available to support writing, study skills, IT and maths. The Academic skills hub holds several workshops every week day to support students.

- High speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations. Students can also access SVE (Southampton Virtual Environment), a virtual Windows University of Southampton desktop that can be accessed from personal devices such as PCs, Macs, tablets and smartphones from any location.
- Computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources).
- Standard ICT tools such as Email, secure filestore and calendars.
- Access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- Central IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library.
- Enabling Services offering assessment and support (including specialist IT support) facilities if you have a disability, dyslexia, mental health issue or specific learning difficulties.
- The Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards.
- Career and Employability services, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV.
- A range of personal support services: mentoring, counselling, residence support service, chaplaincy, health service.
- A Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Students' Union provides

- An academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students' views to the University.
- Opportunities for extracurricular activities and volunteering.
- An Advice Centre offering free and confidential advice including support if you need to make an academic appeal.
- Support for student peer-to-peer groups, such as Nightline.

In the School of Engineering and your Discipline you will be able to access:

- Induction programme for orientation, introduction of the programme and staff, and dissemination of materials.
- Student Coursebook, including guidance on selection of study programmes.
- Administrative and academic material on the School, Programme and individual module web sites and/or Blackboard.
- A personal academic tutor to assist with organisational and personal matters. This role is taken over by the project supervisor when the research project starts.
- Careers advice and dissemination of available job advertisements.
- Personal email account and email access to staff via University system.
- Relevant specialist software on University clusters of computers.
- Formal progress monitoring during research project.
- Support for international students.

Methods for evaluating the quality of teaching and learning

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing anonymous student evaluation questionnaires for each module of the programme.
- Acting as a student representative on various committees, e.g. Staff Student Liaison Committees, School Programmes Committee OR providing comments to your student representative to feedback on your behalf.
- Serving as a student representative on School Scrutiny Groups for programme validation.
- Taking part in programme validation meetings by joining a panel of students to meet with the School Scrutiny Group.

The ways in which the quality of your programme is checked outside the University, are:

- Regular module and programme reports which are monitored by the School
- Programme validation, normally every five years.
- External examiners, who produce an annual report.
- Professional body accreditation/inspection.
- A national Research Assessment Exercise (our research activity contributes directly to the quality of your learning experience).
- Institutional Review by the Quality Assurance Agency.

The ways in which the quality of your programme is checked inside the University, are:

- Discipline, Part, education and project boards, convening regularly during each academic year, which consider the outcomes of each module's delivery and evaluation.
- Moderation of examination papers, coursework and projects, both internally and externally.
- Annual examiners' meetings and examiners' boards.
- Annual programme and module reviews considering your feedback from all sources, feedback from teaching panels, external examiners and other bodies and student performance.
- Periodic meetings of the School Industrial Advisory Board.
- Response to results from the National Student Survey.
- Revalidation by the University at least every five years.

Career Opportunities

Student graduating from our MSc degrees obtain employment as graduate engineers with many leading employers both consultants and contractors and also regulatory authorities and local authorities. Support is available to develop their CVs and interview skills. In addition to careers in civil and mechanical engineering, the transferrable skills that our students obtain make them attractive to a wide range of graduate recruiters, from financial services through to IT and management consultancy.

External Examiner(s) for the programme

Name Professor Tim O'Doherty

Institution Cardiff University

Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their personal tutor in the first instance.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook at <http://www.southampton.ac.uk/studentsservices/academic-life/faculty-handbooks.page> and at http://www.southampton.ac.uk/engineering/undergraduate/courses/civil_engineering/h201_meng_civil_engineering.page?

Revision History

1. April 2008 (J.S. Shrimpton)
2. August 2012 (P.A.B. James)
3. March 2013 Regulations updated (D Mead)

4. July 2013 Revised module structure follows move from 10 to 15 CATS (P.A.B. James)
5. Nov. 2013 CQA_251113
6. March 2014 CQA_250314CQA_130614
7. Update to Programme Overview (CMA Changes) - September 2015
8. CQA textual updates August 2016, August 2017
9. March 2019 (Patrick James, for programme validation, AHEP LOs and programme LOs)
10. Revision following Programme Validation, LO, April 2019

MSc Sustainable Energy Technologies

The information within this Appendix is liable to change in minor ways from year to year. It is accurate at the time of writing.

Students are required to take ONE optional module in semester 1 and ONE optional module in semester 2 in addition to THREE compulsory modules in each semester. Where optional modules have been specified, the following is an indicative list of available optional modules, which are subject to change each academic year. Please note in some instances modules have limited spaces available.

The research component of the MSc consists of a Core module (FEEG6012) of 30 ECTS/60 CATS which is a research dissertation.

3878 Sustainable Energy Technology

Module Code	Module Name	Semester	ECTS/ CATS Credit Points	Type of module	Level
SESG6041	Introduction to Energy Technologies, Environment and Sustainability	1	7.5/15	Compulsory	7
FEEG6007	Principles of photovoltaics, fuel cells and batteries	1	7.5/15	Compulsory	7
SESM6032	Sustainable Energy Systems, Resources and Usage	1	7.5/15	Compulsory	7
FEE6008	Advanced photovoltaics, fuel cells and batteries	2	7.5/15	Compulsory	7
SESS6067	Renewable energy from environmental flows: wind, wave and tide	2	7.5/15	Compulsory	7
SESM6043	Applications of Renewable Energy, Storage and Nuclear Energy	2	7.5/15	Compulsory	7
FEEG6012	Research Project for FEE Masters Programmes (core)	3	30/60	Core	7
	Plus 15 credits (ONE MODULE) in S1 from:				
SESM6034	Advanced Electrical Systems	1	7.5/15	Optional	7
SESM6040	Thermofluid Engineering for Low Carbon Energy	1	7.5/15	Optional	7
SESS6070	Offshore Engineering and Analysis	1	7.5/15	Optional	7
FEEG6025	Data Analysis and Experimental Methods for Civil and Environmental Engineering	1	7.5/15	Optional	7
	Plus 15 credits (ONE MODULE) in S2 from:				
CENV6141	Bioenergy	2	7.5/15	Optional	7
CENV6148	Energy Performance Assessment of Buildings	2	7.5/15	Optional	7
CENV6085	Waste Resource Management	2	7.5/15	Optional	7

Modules contributing to meeting the different programme learning outcomes.

	Learning Outcome	Assessment method	Module	Examples of Learning Outcome within Modules
	Science and Mathematics			
SM7M	A comprehensive understanding of the relevant scientific principles of the specialisation	Exam, coursework	SESG6041, FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6034, SESM6040, SESS6070, FEEG6025, CENV6148, CENV6085	FEEG60012 <i>DISSERTATION SUBMISSION AND POSTER EVENT</i>
SM8M	A critical awareness of current problems and/or new insights most of which is at, or informed by, the forefront of civil engineering	Exam, coursework	SESG6041, FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6034, SESM6040, SESS6070, FEEG6025, CENV6148, CENV6141	SESG6041 <i>GROUP REPORT AND PRESENTATION - 2 COUNTRY ANALYSIS 2040 SCENARIOS</i>
SM9M	Understanding of concepts relevant to mechanical engineering, some from outside engineering, and the ability to evaluate them critically and to apply them effectively, including in engineering projects.	Exam, coursework	SESG6041, SESM6032, SESS6070, CENV6141	SESG6041 <i>GROUP REPORT AND PRESENTATION - 2 COUNTRY ANALYSIS 2040 SCENARIOS</i>
	Engineering analysis			
EA6M	Ability both to apply appropriate engineering analysis methods for solving complex problems in engineering and to assess their limitations	Exam, coursework	SESG6041, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6034, SESS6070, FEEG6025, CENV6148	SESG6041 <i>GROUP REPORT AND PRESENTATION - 2 COUNTRY ANALYSIS 2040 SCENARIOS</i>
EA5M	Ability to use fundamental knowledge to investigate new and emerging technologies	Exam, coursework	SESG6041, FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, SESM6034, SESM6040, FEEG6025, CENV6148	FEEG60012 <i>DISSERTATION SUBMISSION AND POSTER EVENT</i>
EA7M	Ability to collect and analyse research data and to use appropriate engineering analysis tools in tackling unfamiliar problems, such as those with uncertain or incomplete data or specifications, by the appropriate innovation, use or adaptation of engineering analytical methods.	Exam, coursework	SESG6041, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6034, SESM6040, SESS6070, FEEG6025, CENV6148	FEEG60012 <i>DISSERTATION SUBMISSION AND POSTER EVENT</i> SESM6032 <i>BLACKBOARD ASSESSMENTS ON ENERGY RELATING TO DUKES DATASETS</i>
	Design			
D9M	Knowledge, understanding and skills to work with information	Exam, coursework	SESG6041, SESS6067, SESM6043, FEEG6012,	SESG6041 <i>TIDE MILL ANALYSYS - ASSESSED VIA PRESENTATION</i>

	that may be incomplete or uncertain, quantify the effect of this on the design and, where appropriate, use theory or experimental research to mitigate deficiencies		SESM6034, SESS6070, FEEG6025, CENV6148	<i>OF ANALYSIS APPROACH AND OUTINED ASSUMPTIONS</i>
D10M	Knowledge and comprehensive understanding of design processes and methodologies and the ability to apply and adapt them in unfamiliar situations	Exam, coursework	FEEG6008, SESS6067, SESM6034, FEEG6025, CENV6148, CENV6085, CENV6141	SESG6041 <i>TIDE MILL ANALYSYS - ASSESSED VIA PRESENTATION OF ANALYSIS APPROACH AND OUTINED ASSUMPTIONS</i>
D11M	Ability to generate an innovative design for products, systems, components or processes to fulfil new needs.	Exam, coursework	SESG6041, SESS6067, SESM6034, SESM6040	SESG6041 <i>TIDE MILL ANALYSYS - ASSESSED VIA PRESENTATION OF ANALYSIS APPROACH AND OUTINED ASSUMPTIONS</i> SESG6041 <i>2 COUNTRY ANALYSIS OF ENERGY SYSTEM - ASSESSED VIA FORMAL REPORT</i>
	Economic, legal, social, ethical and environmental context			
EL8M	Awareness of the need for a high level of professional and ethical conduct in engineering	Exam, coursework	SESG6041, SESM6032, SESM6043, FEEG6012, SESM6040, SESS6070, FEEG6025, CENV6148, CENV6085	SESG6041 <i>FOLLOW BRIEF OF 2 COUNTRY COURSEWORK TO DELIVER A SOCIALLY ACCEPTANCE FUTRURE ENERGY PATHWAY</i>
EL9M	Awareness that engineers need to take account of the commercial and social contexts in which they operate	Exam, coursework	SESG6041, SESM6032, SESS6067, SESM6043, FEEG6012, SESM6034, SESM6040, SESS6070, FEEG6025, CENV6148, CENV6085, CENV6141	SESG6041 <i>ECONOMIC ANALYSIS OF TIDE MILL CONVERSION - ASSESSED BY GROUP PRESENTATION</i>
EL10M	Knowledge and understanding of management and business practices, their limitations, and how these may be applied in the context of the particular specialisation	Exam, coursework	SESG6041, FEEG6008, SESS6067, FEEG6012, SESS6070, CENV6085	SESG6041 <i>APPLYING PRINCIPLES FROM LECTURES TO 2 COUNTRY ANALYSIS 2040 SCENARIO - ASSESSED BY REPORT AND PRESENTATION. ELING TIDE MILL SOLUTION - PRESENTATION.</i>
EL11M	Awareness that engineering activities should promote sustainable development and ability to apply quantitative techniques where appropriate	Exam, coursework	SESG6041, SESM6032, SESS6067, SESM6043, FEEG6012, SESM6040, CENV6148, CENV6085, CENV6141	SESM6032 <i>ENGINEERING OF FUTURE CITIES - TRANSPORT, AIR QUALITY, ENERGY. ASSESSED VIA BLACKBOARD ASSESSMENT</i>
EL12M	Awareness of relevant regulatory requirements governing engineering activities in the context of the particular specialisation	Exam, coursework	SESS6067, FEEG6025, CENV6148, CENV6085	SESG6041 <i>GRID CONNECTION OF ELING TIDE MILL DESIGN - COMPLIANCE WITH CONNECTION STANDARDS - ASSESSED VIA PRESENATATION</i>
EL13M	Awareness of and ability to make general evaluations of risk issues in the context of the particular specialisation, including health & safety,	Exam, coursework	SESG6041, FEEG6012, CENV6148, CENV6085	SESG6041 <i>ELING TIDE MILL DEVELOPED SOLUTION - CONSIDERATION OF RISK - ASSESSED VIA PRESENTATION</i>

	environmental and commercial risk.			
	Engineering Practice			
P12	Advanced level knowledge and understanding of a wide range of engineering materials and components	Exam, coursework	SESG6041, FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6034, SESM6040, FEEG6025, CENV6148, CENV6085	SESM6032 <i>CHP SYSTEMS – ASSESSED VIA BLACKBOARD COURSEWORK</i>
P9m	A thorough understanding of current practice and its limitations, and some appreciation of likely new developments	Exam, coursework	FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6040, CENV6148, CENV6085, CENV6141	SESM6032 <i>UK ELECTRICITY NETWORK, CARBON TRENDS AND FUTURE ENERGY PATHWAY. ASSED VIA DUKES ANALYSIS COURSEWORK VIA BLACKBOARD</i>
P10m	Ability to apply engineering techniques taking account of a range of commercial and industrial constraints	Exam, coursework	SESG6041, FEEG6007, SESS6067, SESM6034, SESS6070, CENV6148	SESG6041 <i>ELING TIDE MILL SOLUTION (GEARBOX, TURBINE, INVERTER ETC) MATERIALS AND COMPONENTS – ASSESSED VIA PRESENTATION. REPORT AND PRESENTATION - 2 COUNTRY ANALYSIS 2040 IS TO ACHIEVE AN 80% RENEWABLE ACROSS ALL SECTORS</i>
P11m	Understanding of different roles within an engineering team and the ability to exercise initiative and personal responsibility, which may be as a team member or leader.	Exam, coursework	SESG6041	SESG6041 <i>TIDE MILL AND 2 COUNTRY GROUP WORK TASKS – ASSESSMENT OF GROUP COHESION IN PRESENTATIONS AND REPORT</i>
	Additional general skills			
G1	Apply your skills in problem solving, communication, working with others, information retrieval, and the effective use of general IT facilities	Exam, coursework	SESG6041, FEEG6007, SESM6032, FEEG6008, SESS6067, SESM6043, FEEG6012, SESM6040, SESS6070, FEEG6025, CENV6148, CENV6141	FEEG60012 <i>DISSERTATION SUBMISSION AND POSTER EVENT</i>
G2	Plan self-learning and improve performance, as the foundation for lifelong learning/CPD	Exam, coursework	SESG6041, FEEG6008, SESS6067, FEEG6012, SESM6040, FEEG6025, CENV6141	SESG6041 <i>INDIVIDUAL ESSAY, 2 COUNTRY GROUP WORK CONTRIBUTION – ASSESSED VIA THE WRITTEN SUBMISSIONS</i>
G3	Monitor and adjust a personal programme of work on an on-going basis	Exam, coursework	SESG6041, FEEG6008, SESS6067, FEEG6012, SESM6040, FEEG6025, CENV6141	SESG6041 <i>INDIVIDUAL ESSAY, 2 COUNTRY GROUP WORK CONTRIBUTION – ASSESSED VIA THE WRITTEN SUBMISSIONS</i>
G4	Exercise initiative and personal responsibility, which may be as a team member or leader.	Exam, coursework	SESG6041, FEEG6012	FEEG60012 <i>DISSERTATION SUBMISSION AND POSTER EVENT</i> SESG6041 <i>INDIVIDUAL ESSAY, 2 COUNTRY GROUP WORK CONTRIBUTION – ASSESSED VIA THE WRITTEN SUBMISSIONS</i>

CORE

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below.

In some cases you'll be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University's Fees, Charges and Expenses Regulations in the University Calendar available at www.calendar.soton.ac.uk.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Approved Calculators		Students may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers. The University species permissible models from time to time and these may be purchased from any source.
Stationery		You will be expected to provide your own day-to-day stationary items, e.g. pens, pencils, notebooks, etc). · The third year module FEEG3003 Individual Project requires you to print an AI portrait poster on paper. The typical cost for this is in the range £5 to £20.
Textbooks		Where a module specifies core texts these should generally be available on the reserve list in the library. However, due to demand, students may prefer to buy their own copies. These can be purchased from any source. Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.
Equipment and Materials	Design equipment and materials:	We provide a wide range of resources to support project based modules and activities and these will allow you to complete your assessed exercises to the highest standard. However, you may wish to customise your project by purchasing additional resource e.g. alternative manufacturing materials, electronic components, etc. You may also incur additional costs for printing e.g. large format drawings. Standard construction/modelling materials will be provided where appropriate, unless otherwise specified in a module profile. For customisation of designs/models calling for material other than standard construction/ modelling materials, students will bear the costs of such alternatives. FEEG6012 Reasonable expenses for travel and materials of up to £300 may be reclaimed through the School of Engineering Student Office. For project costs in excess of £300 students should discuss possible sources of funding with their supervisor and should not proceed with any expenditure until a further funding source has been agreed. http://www.southampton.ac.uk/engineering/undergraduate/modules/feeg6012_msc_research_project.page?

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
	Field Equipment and Materials:	none
IT	Computer discs	Available from UoS shop as required
Clothing		
	Fieldcourse clothing:	You will need to wear suitable clothing when attending fieldcourses, e.g. waterproofs, walking boots. You can purchase these from any source.
Printing and Photocopying Costs		<p>In some cases, coursework and/or projects may be submitted electronically. Where it is not possible to submit electronically students will be liable for printing costs. Students are expected to cover the costs associated with the printing of drawings and graphic presentations. These are typically expected to be of the order of £20 - 50 per student.</p> <p>The third year module FEEG3003 Individual Project requires you to print an A1 portrait poster on paper at a typical cost of £20.</p> <p>Reasonable expenses for travel and materials of up to £300 may be reclaimed through the School of Engineering Student Office. For project costs in excess of £300 students should discuss possible sources of funding with their supervisor and should not proceed with any expenditure until a further funding source has been agreed. (equipment).</p>
Optional Visits (e.g. museums, galleries)		Some modules may include additional optional visits. You will normally be expected to cover the cost of travel and admission, unless otherwise specified in the module profile. For costs related to study abroad please see the relevant module profile.
Travel and Subsistence		For additional costs related to travel and subsistence for the Industrial Placement Year, please refer to the module profile for FEEG 3009
