

Addendum to the Programme Specification

5992 MSc Statistics

This Addendum has been produced to highlight the key changes made to the existing Programme Specification as a result of the University's response to the Covid-19 Pandemic. You should read it in conjunction with the relevant Programme Specification from the year you started your programme.

[Programme Specification for entry in 2020-21](#)

University level information

In view of COVID-19, the University has had to make changes to some elements of programme delivery for 2020-21. These changes have included the method of delivery, such as face-to-face and online, and the number of modules available.

The University aims to provide as much of a face-to-face component to your education as prevailing conditions at the time allow, combined with its new blended approach that will develop active independent and group online learning.

As the COVID-19 pandemic develops, the University's response to this and other issues may likewise need to evolve. The University will consult with student representatives as necessary and appropriate and will communicate changes to you as soon as practicable so that you have the information you need to understand how a change may impact you and what steps you need to take next. The University remains committed to supporting you as you learn.

Programme Information

In light of Covid-19, teaching and learning methods may be adapted. Lectures, seminars, tutorials, and consultation with academic staff may be delivered online or in person as the prevailing conditions allow. Group sizes for tutorials and seminars may be adjusted. Assessment methods may also be adapted. For example, in-class tests may be replaced by assignments, weightings of assessments may change, exams may be replaced by coursework or take-home assignments and group presentations and projects may take place online or be adapted to allow for social distancing guidelines.

Programme Structure

Where optional modules have been specified, the following is an indicative list of available optional modules, which are subject to change each academic year. Please note that, in some instances, modules have limited spaces available.

Part 1

Semester 1				Semester 2			
Modules	ECTS	CATS	Module type	Modules	ECTS	CATS	Module Type
MATH6173 Statistical Computing	7.5	15	Core	MATH6031 Statistics Project	30	60	Core

MATH6174 Likelihood and Bayesian Inference	7.5	15	Core				
MATH6026 Statistical Seminar Series I	0	0	Comp	MATH6027 Design of Experiments	7.5	15	Comp
STAT6123 Generalised Linear Models	7.5	15	Comp	STAT6028 Statistical Seminar Series II	0	0	Comp
MATH6143 Survival Models	7.5	15	Comp	STAT6124 Statistical Consultancy	3.75	7.5	Comp
The option modules shown below constitute an indicative list, there will always be choice but the options might vary between years.							
Must select 37.5 CATS from the following list of option modules							
Modules	ECTS	CATS	Module type	Modules	ECTS	CATS	Module Type
				MATH6168 Machine Learning	7.5	15	Option
				MATH6169 Flexible Regression	7.5	15	Option
				MATH6005 Introduction to Python	3.75	7.5	Option
				MATH6011 Forecasting	3.75	7.5	Option
				MATH6033 Epidemiological Methods	3.75	7.5	Option
				MATH6151 Clinical Trials	3.75	7.5	Option
				MATH6068 Statistical Genetics	3.75	7.5	Option

Part 2

Semester 1				Semester 2			
Modules	ECTS	CATS	Module type	Modules	ECTS	CATS	Module Type
MATH6031 Statistics Project	30	60	Core
